

Eastman Credit References are now provided
exclusively via a new credit reference web-based
Internet application

<https://customercenter.eastman.com/creditreference/default.aspx>

(this link must be typed / copied exactly as is, as a failure to do so will direct you to an incorrect system within the Eastman network and you will not be able to access the customer data you desire)

To ensure confidentiality, the new website requires any company seeking credit information on an Eastman customer must first obtain the Eastman Customer ID Number directly from the company being referenced. Only the referenced company can provide the authorization number, signifying permission to release confidential credit history. They obtain this number by contacting the Eastman Chemical Company Credit Department.

See email below.

Companies accessing the website will be required to register, providing company name and contact information.
