

JCP Plastic redefines food container value in the Super Lock brand.

Micron Ware Super Lock food boxes feature BPA-free Eastman Tritan™ copolyester.

Since winning the prestigious SME's National Award in 2014 for the Best SME in Plastics (presented by the Office of Small and Medium Enterprises Promotion or OSMEP), JCP Plastic Limited has continued its emphasis on high quality, innovative products for the consumer.

Under the brand names Micron Ware and Super Lock, the Bangkok-based company produces high quality, world-class products at affordable prices.

Today's best example is the market-leading Super Lock brand of containers made with clear, durable, and BPA-free Eastman Tritan™ copolyester.

"Tritan is the best material for a new generation of consumers who are concerned with healthy living," says Mr. Prakrit Chareonchitnum, president of JCP Plastic Limited.

Tritan fits with the trend in the region toward greater use of plastic containers. Consumers once associated plastics with scratched surfaces, chemical smells, and off-tasting food, but Tritan looks and feels like glass. Plus, it has the advantage of being shatterproof and much lighter than glass.

The Super Lock food boxes feature airtight sealing lids with snap-down buckles on all four sides. They also feature Microban® antimicrobial protection to inhibit the growth of bacteria—and help stored food stay fresh longer.

JCP uses Tritan, a newcomer to Thailand, to differentiate its food boxes based on quality and healthy living. Customers appreciate that the food boxes are produced in Thailand with Tritan that is made in the U.S.A. And retailers like the shelf appeal of the premium Super Lock product line.

JCP estimates they currently have a 40% share of market in Thailand. It is in the process of expanding the product line and increasing exports throughout Asia and to Australia and Europe.

Super Lock containers are available in round, square, and rectangular shapes with snap-down lids for an airtight seal.

Advantages of Eastman Tritan™ copolyester

- Glasslike clarity with less weight than glass
- Impact strength
- Scratch resistance
- Dishwasher durability
- Made without BPA
- Stain and odor resistant
