

## Safety, sustainability, and performance

*Gobilab uses Eastman Tritan™ copolyester for reusable water bottle designed to cut workplace waste.*

Gobilab, based in France, used Eastman Tritan™ copolyester to develop The Gobi, a 400-mL reusable water bottle designed for office use and aimed at reducing waste. The company's goal is to raise awareness of environmental issues by offering innovative alternatives. In Tritan, Gobilab found the right balance of properties, including lasting clarity, dishwasher durability, and odor and stain resistance, needed to help extend product life and maintain aesthetic appeal. And since Tritan is BPA-free, Gobilab is able to satisfy market demands and customer concerns.

"Overall, Tritan proved to offer the best option for product safety, sustainability, and performance," explained Florence Baitinger, one of Gobilab's creators.

**For more information on Eastman Tritan™ copolyester, visit [www.eastman.com/tritan](http://www.eastman.com/tritan).**

*The Gobi is an appealing, sustainable solution made possible with Eastman Tritan™ copolyester.*
