EASTMAN

Versatility: a key ingredient in modern French cuisine

Mastrad switches to Eastman Tritan™ copolyester for steam cooker.

A manufacturer of innovative kitchen accessories, the French company Mastrad takes its design ingenuity to a new level with the multilevel steam cooker that allows users to rinse, steam, serve, store, and reheat food items in one versatile product. The stackable steaming tray/bowl, made with Tritan, enables steaming of multiple food items at the same time in the microwave. "Selecting Tritan copolyester proved to meet our aesthetic, functional, and manufacturing needs," said Nicolas Bertolino, research and development, quality, and manufacturing manager, Mastrad. "Cooking foods like meat, seafood, vegetables, and rice by steaming is a popular, healthy method of food preparation. Utilizing Tritan copolyester for the multilevel steam cooker helps us further meet the demands of health conscious consumers by providing a product that is BPA-free."

For more information on Eastman Tritan™ copolyester, visit www.eastman.com/tritan.

*Available in red, green, and black,
the Mastrad® multilevel steam cooker, made with Tritan,
is heat resistant, BPA-free, and dishwasher durable.*
