EASTMAN

Options in Omega

Omega Blender's large capacity jar is made of Eastman Tritan™ copolyester.

The Omega blender finds the ideal balance between blending options and operating efficiency. With a Goldilocks approach of "not too hot and not too cold," Omega combines control and capacity in a recipe that's just right for the home kitchen. Its compact base encases an efficient 1-HP motor engineered to mix a variety of ingredients into creams, soups, smoothies, and iced beverages with perfect consistency. Better yet, Omega's Combo Pack includes a container made with glasslike clarity and a smaller stainless steel container, allowing cooks to choose the jar best suited to specific blending tasks. The stainless steel cutting assembly is removable for cleaning on both containers, and customers love that the jar made with Tritan is dishwasher safe and highly durable.

For more information on Eastman Tritan™ copolyester, visit www.eastman.com/tritan.

The versatile Omega Blender includes a Tritan-made, shatterproof jar and a smaller stainless steel jar.
