Products made with Eastman innovation

EASTMAN

Tea is for Tritan.

Eastman Tritan™ copolyester is part of the whimsical Dunkfish tea infuser.

Industrial designer and entrepreneur Grant Bell, inspired by the youthful energy and innocence of his children, created Dunkfish—tea infusers with an attitude. The creative fish design combines food grade silicon on top with a matching translucent rib cage made of Eastman Tritan™ copolyester which houses the mesh basket for tea leaves. Tritan is BPA-free, has high-temperature capabilities, and offers design flexibility—attributes that convinced Bell that it was the right choice for the Kickstarter-funded product.

"After seeing the Tritan samples and doing some research on the Eastman Innovation Lab, I knew it was the way to go," Bell recalled.

For more information on Eastman Tritan™ copolyester, visit www.eastman.com/tritan.

Dunkfish tea infusers made with Eastman Tritan™ copolyester are available in four fun colors—blue, orange, red, and citron.
