

## Pouring is easy; preserving is practical.

*Savino™, a sleek wine preservation system, uses Eastman Tritan™ copolyester.*

Entrepreneur and marketing professional Scott Tavenner developed Savino™—an attractive and easy-to-use carafe that extends the life of wine. The innovative carafe and its sealing top are made of high-grade flint glass, while the heart of the system is an internal float made of BPA-free Eastman Tritan™ copolyester and food grade silicon. “We chose Tritan because of its durability and ability not to impart any taste into the wine,” says Tavenner. “It is also dishwasher safe and resistant to discoloration.” The float serves as a constant barrier between oxygen in the air and the wine, effectively preserving the wine’s characteristics and taste for approximately a week. With the stylish Savino carafe, pouring wine is easy and preserving is practical.

**For more information on Eastman Tritan™ copolyester, visit [www.eastman.com/tritan](http://www.eastman.com/tritan).**

*The handy Savino™ combines a glass carafe with parts made of Eastman Tritan™ copolyester and silicon in a unique wine preservation system.*
