EASTMAN

Anything but ordinary

Heelys and Eastman Tritan™ copolyester create a radical transformation in wheeled footwear.

Heelys, creator of the world's first shoe with a removable wheel in the heel, has developed a new line of portable skateboards using Eastman Tritan™ copolyester. The Nano Inline Footboard is radically different from traditional skateboards. The new board required a material as revolutionary as the design; it needed to be extremely strong and rugged but lightweight enough for users to easily perform a variety of tricks. Heelys chose Tritan because of its outstanding toughness, design flexibility, and ease of processing. Plus, it's manufactured without BPA or phthalates, allowing the board to meet regulations for chemicals in children's products. With the design flexibility of Tritan, the Nano is customizable and comes in a variety of colors.

For more information on Eastman Tritan™ copolyester, visit www.eastman.com/tritan.

The Nano Inline Footboard, made with Eastman Tritan™ copolyester, is highly customizable and available in several different colors.
