

## Clarus: a clear advantage

*U.S. Acrylic manufactures its Clarus servingware line with Eastman Tritan™ copolyester.*

A leading supplier of acrylic housewares and giftware products since 1978, U.S. Acrylic switched to Tritan for its Clarus collection of tumblers, stemware, pitchers, mugs, and serving accessories. Jerry Lee, CEO of U.S. Acrylic, said, "We recognized the importance of BPA-free material, and we quickly realized the other advantages of Eastman Tritan™ copolyester." With high-use products, U.S. Acrylic wanted to enhance quality with improved durability and chemical and heat resistance. The proof is in the pudding: one of Chicago's busiest restaurants, Bob Chinn's Crab House, began using Clarus tumblers and found them to hold up better than other tumblers made with styrene acrylonitrile (SAN). After six months of use and an estimated 500 cycles in a commercial dishwasher, Clarus tumblers maintained their crisp clarity and visual appeal.

**For more information on Eastman Tritan™ copolyester, visit [www.eastman.com/tritan](http://www.eastman.com/tritan).**

*Clarus serving bowls are crafted in crystal clear, unbreakable, BPA-free Eastman Tritan™ copolyester.*
