EASTMAN

Tapping into something great

Beer Tubes™ uses Eastman Tritan™ copolyester to meet the demand for high quality beverage dispensers.

Beer Tubes™ created beverage dispensers made with Eastman Tritan™ copolyester that meet the demand in restaurants and bars for durable, aesthetically pleasing barware free of bisphenol A (BPA). Tritan perfectly balances the properties of clarity, toughness, and heat and chemical resistance. Beer Tubes switched from polycarbonate (PC) to Tritan in its line of tabletop beverage dispensers because of the advantages it offers to customers. The tubes will not crack, craze, or whiten from everyday use and repeated dishwashing. The tabletop dispenser, available for commercial or individual residential use, consists of a beverage containing tube, dispensing tap, and customizable sports- or non-sports-themed base.

For more information on Eastman Tritan™ copolyester, visit www.eastman.com/tritan.

Eastman Tritan™ copolyester meets the demand for durable, aesthetically pleasing barware.
