EASTMAN

A fresh take on hydration

Thermos selects Eastman Tritan™ copolyester for Intak water bottle.

Bringing innovation to portable food storage and hydration products since 1904, the Thermos brand created the Intak water bottle made of Eastman Tritan™ copolyester. Intak's handy design features include a flip-up loop and ergonomic grip for easy carrying, convenient push-button opening, and a unique intake meter to help users monitor daily consumption.

"We wanted a product that would provide the durability and clarity of a polycarbonate with a BPA-free alternative," said Rick Dias, President and Chief Operating Officer, Thermos. "The response to the Intak line has been great. Retailers are all looking for BPA-free alternatives for their hydration sets, and the Intak line is the perfect solution."

For more information on Eastman Tritan™ copolyester, visit www.eastman.com/tritan.

Thermos Intak hydration bottles, made of Eastman Tritan™ copolyester, are available in a selection of colors.
