

Seeing the taste

Blackwell Plastics selects Eastman Tritan™ copolyester for crystal clear drink dispenser faceplate.

Blackwell Plastics puts a new face on the frozen drink machine. The Houston, Texas-based company, with its long and successful history in the injection molding industry, created a new, appealing faceplate for frozen drink dispensers. Made of Eastman Tritan™ copolyester, Blackwell's clear faceplate is used by major restaurant chains nationwide, allowing frozen drink customers to see their refreshing beverage as it is dispensed from the machine. The faceplate's crystal clarity enhances the drink's delectability, and Tritan's excellent durability—with no cracking, crazing, or discoloring—is a necessity for high use and frequent cleaning in the restaurant environment. "The unique qualities of Tritan allowed us to create and mold a plastic that met all of our needs and those of the end user," said Jeff Applegate, president of Blackwell Plastics.

For more information on Eastman Tritan™ copolyester, visit www.eastman.com/tritan.

Tritan offers a crystal clear and highly durable faceplate for the frozen beverage dispenser.
