EASTMAN

Pure, fresh water from faucet to fridge

CamelBak Relay pitcher is made of BPA-free Eastman Tritan™ copolyester.

Drinking pure, fresh water just got easier. The “water people” at CamelBak have created the new Relay pitcher that allows you to filter fresh water from your faucet in a snap. Its unique double filter technology twice removes chlorine and odors—once as you fill and again as you pour. The incredibly clear and durable Relay pitcher made with Tritan has a spill-proof locking lid and space-saving design that is slim enough to fit in most refrigerator doors. Customers enjoy fresh filtered water for many uses, from making morning coffee to filling water bottles to take along.

For more information on Eastman Tritan™ copolyester, visit www.eastman.com/tritan.

CamelBak features a sleek design and double-filter technology for its innovative Relay pitcher made with Tritan. (Lid is made of polypropylene.)
