EASTMAN

“Sans BPA” is the new norm.

French manufacturer Saint Romain uses BPA-free Eastman Tritan™ copolyester in drinkware and tableware.

After France effectively banned the use of materials containing BPA in food contact applications, French manufacturers of plastic tableware and cookware have sought alternative high performance materials. The family-owned Saint Romain, specializing in servingware for hotels and the catering industry, is a midsize manufacturer pleased with its decision to use Eastman Tritan™ copolyester. “As we switch from using PC to Tritan for our tableware and drinkware products, we are thankful for the ongoing technical support Eastman provides,” said Richard Saint Romain, owner. “If we have production-related or end-user questions, we know we can reach out to Eastman.” In addition to satisfying compliance with product regulations in France, Tritan fits the bill for toughness, clarity, and dishwasher durability—inspiring new servingware designs at the company.

For more information on Eastman Tritan™ copolyester, visit www.eastman.com/tritan.

Saint Romain tableware, made with Eastman Tritan™ copolyester, offers serving and storage solutions that are safe and practical to use.
