

KEEP EXPLORING NEW DIRECTIONS FOR REUSABLE BOTTLES.

Clearly in good taste—anywhere you take them

Today, there is a reusable bottle for every taste. You'll find a world of different styles, colors, and drinking features to match any setting—wherever people want to stay hydrated in style.

Responsible hydration has gone from the playing field and gym to the home, office, school backpack—even the corporate boardroom.

A clear trend toward Tritan™ from Eastman

As the premier material for clear reusable bottles, Tritan™ from Eastman supports the healthy trend toward reusable bottles every step of the way. After 10 years in the market, Tritan has been used by every major manufacturer—all looking for:

CLARITY

Glasslike clarity; glossy; resistant to microcracks and hazing

DURABILITY

Won't shatter like glass; resistant to cracking or breaking like other plastics; won't ding and dent like stainless and aluminum

STYLE

Gives manufacturers greater freedom to explore new designs

SAFETY

Made without bisphenol A (BPA) or BPS; does not contain chemicals requiring a warning under California's Prop 65

More healthy trends

- Tritan encourages good bottle hygiene.
- Tritan enhances good taste by not retaining unpleasant flavors or odors.
- Tritan satisfies consumer concerns about sustainability compared with single-use bottles and less durable plastics.

Clearly raising the bar for confidence

Confidence that a bottle is good enough for your family can start with something as simple as being able to see the contents—or see any foreign objects—in the bottle.

But you have many more reasons to feel confident about selecting reusable bottles made with Tritan™ from Eastman:

DISHWASHER SAFE AND DURABLE

- Hygiene is critical for reusable bottles. With Tritan, bottles are easy to clean every day.
- Tritan can withstand the heat, moisture, and detergents of hundreds of dishwashing cycles—without hazing, cracking, or crazing like other plastics.

WORLDWIDE ACCEPTANCE

Tritan has been used successfully for more than 10 years by the world's leading companies.

COMPLIANCE

Tritan does not contain chemicals requiring a warning under California's Proposition 65.

SUSTAINABLE BEAUTY

- You can be confident that bottles made with Tritan will retain their clarity, vibrant colors, gloss, and intricate designs.
- You can rest assured that bottles made with Tritan have a smaller environmental footprint compared with single-use bottles or reusable bottles made with materials that can shatter, break, or warp in the dishwasher.
