### Eastman™ CABs help restore El Angel de la Independencia

Eastman™ CABs helped restore and protect El Angel, a Mexico national monument symbolizing independence. To protect the monument from cracking and corrosion, a coating containing Eastman™ CABs was used on the delicate gold leaf and the stone column restoration.

**Results:** Eastman™ CABs have decades of experience in helping improved appearance and application efficiency. It is an honor that CABs were chosen to help ensure that El Angel can continue to watch over the people of Mexico.
