

Filling the gap

Geocell Systems, Inc. "fills the gap" using Eastman Spectar™ copolyester

Rapid Deployment Flood Walls or Rapid Deployment Fortification Walls, known as RDFW, function as expandable, stackable, modular walls and are developed by Geocell Systems, Inc. from extruded sheet of Eastman Spectar™ copolyester. The honeycomb-like grids are reusable and can be both assembled and filled with sand approximately 100 times faster than a traditional sandbag wall. "Not only can the RDFW be deployed quickly, it provides a much stronger flood barrier," says Al Arellanes, inventor of the RDFW and president of Geocell. "In a flood fight, speed and efficiency save lives and money."

"The ability to reuse RDFW over several flood events dramatically reduces its effective per-use cost," Arellanes explains.
