

Eastman™ rosin products

Natural and renewable resins for adhesion, wetting, and viscosity control

Eastman™ rosin products bring the strength and renewability of nature to the market. Primarily sourced from living pine trees, Eastman™ rosin-based products deliver value to the following markets:

- Adhesives and sealants
- Coatings and inks
- Household and personal care
- Rubber and plastic compounding
- Cement and asphalt modification
- Soaps and surfactants

Rosin and its derivatives offer useful properties in numerous applications to deliver specific adhesion traits and improved wetting characteristics to various substrates, as well as added viscosity control. Through sustainable solutions such as Eastman™ rosin-based products, our portfolio is helping drive customers' capabilities and sustainability goals.

To learn more about the benefits of Eastman™ rosin-based products for your application, contact your Eastman representative at 1-800-229-2000 or visit www.eastman.com.

Did you know that . . .

- Because living pine trees pull CO₂ from the air, rosin products pose a favorable carbon footprint compared to products from non-renewable feedstocks?
 - The majority of Eastman™ rosin-based products contain approximately 90% natural and renewable content?
 - Eastman is working with customers to conduct life cycle analyses (LCA) to better understand how Eastman™ products support customers' sustainability goals?
 - Since Eastman sources rosin resins from Europe, North America, Mexico, and China, we are uniquely able to supply rosin derivatives globally?
