

Eastman Turbo Oil 2197 exhibits superior bulk oil stability when thermally and oxidatively stressed.

Thermal & oxidative stability—viscosity & TAN

■ Avg delta visc (40°C, %)	11.8	16.8	9.5	10.6
■ Avg final TAN	2.56	2.42	3.26	5.20

Improved oxidative stability leads to longer oil life and improved operations for an engine.
