RE: 2023 Annual Groundwater Detection Monitoring and  
Corrective Action Effectiveness Report  
Solutia Inc., Anniston, Alabama  
EPA RCRA ID #ALD004019048; EPA CERCLA ID #ALD000400123  
Docket No. 1:02-cv-0749-KOB

Dear Mr. Pierce:

Please find attached an electronic copy of the above-referenced report. This report is submitted in compliance with the requirements of condition II.B.6 of the Facility's RCRA Post-Closure Permit and the Interim Record of Decision for Operable Unit 3 of the Anniston PCB Site. If you should have any questions or need additional information, please call me at (256) 231-8404.

Sincerely,

A handwritten signature in blue ink, appearing to read "E. Gayle Pittman Macolly", with a stylized flourish at the end.

E. Gayle Pittman Macolly  
Principal Remediation Manager, Major Projects  
Solutia Inc.

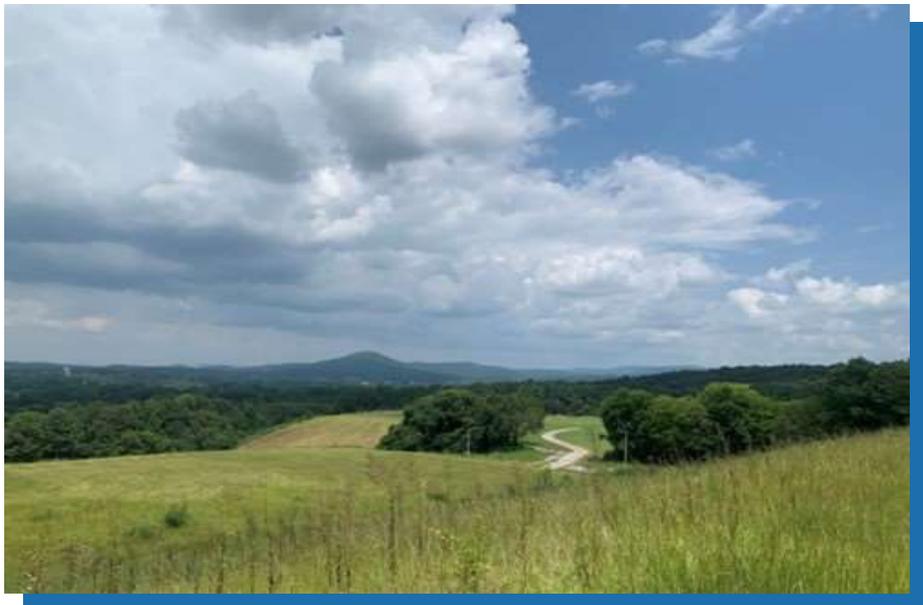

Attachment: 2023 Annual Groundwater Detection Monitoring and Corrective Action  
Effectiveness Report

RCRA Post-Closure Permit ALD 004 019 048  
Consent Decree Docket No. 1:02-ec-0749-KOB

### 1.0 EXECUTIVE SUMMARY

#### 1.1 Basis for Annual Report

This report has been prepared to document the results of groundwater monitoring and corrective action during 2023 at the Solutia Inc. (Solutia) facility in Anniston, Alabama (see Figure 1). Groundwater monitoring and corrective actions are being conducted at Operable Unit 3 (OU-3) of the Anniston PCB Site (site) in accordance with the: i) Resource Conservation and Recovery Act (RCRA) Post-Closure Permit No. ALD 004 019 048 issued by the Alabama Department of Environmental Management (ADEM) on 19 July 2019; and ii) Consent Decree issued by the US Environmental Protection Agency (USEPA) Region 4 on 17 April 2013 and the associated Interim Record of Decision (IROD) and Remedial Action (RA) Work Plan required pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This report describes the requirements for groundwater monitoring and corrective action efforts and documents the progress achieved regarding these activities during the calendar year 2023.

#### 1.2 Summary of Findings

Groundwater monitoring conducted during 2023 has demonstrated that the RCRA groundwater detection monitoring, RCRA groundwater corrective action program, and the CERCLA remedial action are being implemented in accordance with applicable requirements as summarized below. The monitoring well network and corrective action systems are depicted on Figures 2a, 2b, and 3, respectively.

- **RCRA Groundwater Detection Monitoring:** At Waste Management Area (WMA) I (South Landfill Cells 4E and 5E), semi-annual groundwater sampling and testing during 2023 have demonstrated that no release has occurred from the unit.
- **RCRA Groundwater Corrective Action:** At WMA II (New Limestone Bed) and Solid Waste Management Unit (SWMU) 1 (South Landfill), semi-annual groundwater sampling and testing have demonstrated that operation of groundwater recovery systems is successfully intercepting affected groundwater. Statistical trend analysis of groundwater monitoring data shows that concentrations of Constituents of Concern (COCs) are generally stable or decreasing indicating the effectiveness of the groundwater recovery efforts.
- **CERCLA RA:** Groundwater pump-and-treat systems are recovering and treating affected groundwater at Corrective Action Areas near monitoring wells OW-21A and OW-10 (see Figure 4). Groundwater monitoring, which is conducted annually in the vicinity of these wells and at other select locations throughout OU-3, demonstrates that COC concentrations are generally consistent with the prior six years of CERCLA RA monitoring. Concentration trends indicate primarily stable to decreasing conditions for COCs at the CERCLA RA monitoring wells.

## 2.0 FACILITY BACKGROUND

### 2.1 General Facility Description

OU-3 extends over an approximate 155-acre area located about one mile west of downtown Anniston, Alabama (see Figure 1). The manufacturing area comprises the northern portion of the OU-3 area and encompasses approximately 68 acres. The manufacturing portion of OU-3 is bounded to the north by the Norfolk Southern railroad (formerly the Georgia Pacific railway), to the east by Clydesdale Avenue, to the west by the closed West End Landfill and an Alabama Power Company substation and to the south by Highway 202. OU-3 also includes the South Landfill located on the south side of Highway 202 and the northside properties area located north of the manufacturing area.

Solutia manufactures polyphenyl compounds and phosphate ester-based nonflammable hydraulic fluids. Solutia has and does operate under the authorization of applicable environmental permits. Environmental activities at the facility have included a combination of investigative and remedial efforts conducted pursuant to these current and previous permits.

### 2.2 Closed Units and Corrective Action Areas

This annual groundwater monitoring report addresses closed waste management units and corrective action areas identified in the RCRA permit and the IROD.

The facility previously operated the following hazardous waste management and/or disposal areas (see Figure 3):

- WMA I: Closed Cells 4E and 5E of the South Landfill
- WMA II: New Limestone Bed
- SWMU 1: Closed Cells 1W, 2W, 2WA, 3W, 4W, 1E, 2E, and 3E of the South Landfill

Under the provisions of the IROD, a Performance Standards Verification Plan (PSVP) is being conducted to support the Remedial Action for OU-3 that includes the following Corrective Action Areas (see Figure 3):

- OW-21A Corrective Action Area
- OW-10 Corrective Action Area

#### 2.2.1 WMA I: Closed Cells 4E and 5E (northeastern portion of South Landfill)

Closed Cells 4E and 5E of the South Landfill have been designated as WMA I. The disposal unit was used for the disposal of ruffage (i.e., general trash) generated within the parathion and para-nitrophenol production areas. The general trash included discarded empty used fiber drums, empty used sample containers, rubber overshoes, gloves, filter papers, etc., which potentially contained residues of parathion, methyl parathion, and/or para-nitrophenol (PNP). Occasionally, spill residues from the clean-up of these same materials were disposed in these cells.

These wastes were considered hazardous by characteristic as listed pursuant to ADEM Administrative Code 335-14-2-.04(4)(e, f): discarded commercial chemical products, off-specification species, container residues and spills of parathion (P089), methyl parathion (P071), and p-nitrophenol (U170).

WMA I was closed in compliance with provisions contained in an operating permit issued under the Alabama Hazardous Waste Management and Minimization Act (AHWMMA) and RCRA.

No release to groundwater has been documented from WMA I. A series of groundwater monitoring wells is located hydraulically downgradient of the unit to detect any potential release from the unit to groundwater.

### **2.2.2 WMA II: New Limestone Bed**

WMA II, also known as the New Limestone Bed, was used as a surface impoundment for treatment of characteristically hazardous waste. The unit was not used for waste disposal. WMA II was employed to partially neutralize an aqueous process wastewater stream, having the characteristic of corrosivity (D002) prior to biological treatment in the on-site industrial wastewater treatment system. Additionally, the column bottoms from an acetone recovery distillation column (F003) flowed through this surface impoundment. WMA II was closed in compliance with provisions contained in an operating permit issued under the AHWMA and RCRA. A series of interceptor wells located near the northern boundary of OU-3 addresses a release to groundwater in WMA II (see Figure 4).

### **2.2.3 SWMU 1: South Landfill**

Individual closed disposal cells (i.e., 1W, 2W, 2WA, 3W, 4W, 1E, 2E, and 3E) of the South Landfill have been designated as SWMU 1, which has been referred to USEPA as noted in Table IV.4 of the current RCRA permit.

Corrective measures were constructed to prevent transport of affected soils from the South Landfill. These measures included the installation of a multi-layer cap and drainage controls over the waste, with a clay and vegetative cap around the disposal areas. As part of the CERCLA RA work, the caps atop cells 1E, 2E, and 3E (referred to as the polychlorinated biphenyl [PCB] cells) of the South Landfill were upgraded with a high-density polyethylene liner to be compliant with the provisions of RCRA, 42 U.S.C. §6901 et seq. (1976) Subtitle C during the period of mid-2015 to early 2016 (Solutia, 2017b).

Water from a pre-existing seep was observed emanating from beneath the cap at Cell 3E following construction in 2016. A seep collection, conveyance, and treatment system was installed in 2018 to collect water from beneath the cap. The system has been upgraded periodically to increase capacity and reduce iron fouling.

A series of interceptor wells (IWs) located north of the unit (including well IW-14A, located north of Highway 202 and west of Clydesdale Blvd.) addresses a release to groundwater in SWMU 1 (see Figure 4).

### **2.2.4 CERCLA Remedial Action Corrective Action Areas**

The groundwater remedy for OU-3 includes interceptor wells in the vicinity of the two groundwater impact areas identified near wells OW-21A and OW-10 (see Figure 4). An additional component of the groundwater remedy for the site includes monitored natural attenuation (MNA) to address parathion and PNP. Previous data indicate that MNA is only applicable in the OW-21A area, since parathion and PNP concentrations were less than CERCLA Remediation Goals in other portions of the site.

## 2.3 Shallow Stratigraphy and Groundwater Occurrence

### 2.3.1 Shallow Stratigraphy

Previous investigations conducted at the facility have described the shallow stratigraphy beneath the site (particularly Solutia Inc. and Pharmacia Corporation, 2008). Cross-sections prepared for the RCRA Permit Renewal Application (Solutia, 2018) are provided on Figures 5 and 6, which were initially presented as Figures C-4 and C-5, respectively, in the 2008 RCRA Part B Post-Closure Permit Application (Solutia, 2008). General descriptions of the shallow stratigraphic units beneath the facility are provided below.

- **Residuum:** Beneath most of the OU-3 area, the near-surface geology consists of low-permeability residuum composed of silts and clays. In general, boring logs indicate the residuum becomes denser with depth, as expected in a typical weathering profile. For this reason, the residuum has been loosely divided into two units, the shallow and deep, as further described below. The residuum extends to a depth of more than 100 feet below ground surface (bgs) and acts as a semi-confining unit to the underlying Shady Dolomite.
  - **Shallow Residuum:** The material from the surface to a depth of about 45 feet bgs is referred to as the shallow residuum. The unit consists of sandy and silty clays, with fine-to-coarse-grained sand lenses and extends laterally across most of the facility. Where water-bearing, the shallow residuum represents the uppermost aquifer beneath the site.
  - **Deep Residuum:** The material from about 45 feet bgs to the top of weathered bedrock is referred to as the deep residuum.
- **Bedrock:** The deep residuum is underlain beneath most of the facility by dolostone or dolomitic limestone bedrock of the Shady Dolomite Formation, which is encountered at an average approximate depth of 100 feet bgs. At the northernmost area of OU-3, several borings have encountered the highly weathered shale of the Rome Formation underlying the residuum at an approximate depth of 50 feet bgs. To the south, one boring penetrated both the residuum and dolostone, encountering quartzite bedrock of the Weisner Formation (Figure 5).

### 2.3.2 Hydrology

Historical groundwater measurements indicate that groundwater generally flows to the north in the shallow residuum, the deep residuum, and the shallow bedrock units (Solutia, 2018). This general flow direction reflects the surface topography, especially within the shallow residuum, which is generally encountered under unconfined conditions. The surface topography from the northern face of Coldwater Mountain to the south of the site trends from an average slope of approximately 12% to a flatter gradient of approximately 2% across the production area of the facility.

Locally, the shallow groundwater gradient is influenced by anthropogenic features such as backfilled excavations, caps, etc., which produce variable hydraulic conductivities and groundwater recharge rates. Also, the groundwater extraction systems influence the groundwater flow patterns in localized areas of the site. Additional detail on current groundwater flow patterns is provided in Section 5.1.

Monthly rainfall totals at the site for the last five years are presented in Table 7. The annual rainfall for 2023 was 52.41 inches (measured on-site), a decrease of more than 11 inches compared to 2022.

### ***2.3.3 Selection of Monitoring Parameters***

Previous groundwater sampling and testing programs conducted at the Solutia Anniston facility have identified potential COCs to be analyzed during groundwater monitoring programs. Remediation standards have been defined as the RCRA Concentration Limits for corrective actions currently being implemented in accordance with the requirements of the RCRA Permit, and as CERCLA Remediation Goals for remedial actions being conducted in accordance with the IROD. Remediation standards are provided on Table 5 along with the 2023 groundwater monitoring results.

## 3.0 GROUNDWATER SAMPLING PROCEDURES

### 3.1 Basis for Groundwater Monitoring

Groundwater sampling and analysis were conducted semi-annually in accordance with the Quality Assurance Project Plan (Solutia, 2018) from the RCRA Permit Renewal Application, along with the CERCLA OU-3 PSVP Sampling and Analysis/Quality Assurance Project Plan (SA QAPP; Solutia, 2015a).

### 3.2 Sampling Summary and Procedures

The routine RCRA and CERCLA groundwater monitoring events were conducted in April and October 2023, with supplemental groundwater monitoring activities conducted in June and August 2023 (see Table 2). The supplemental monitoring activities included:

- In June 2023, additional samples and field measurements were collected from five monitoring wells (OW-10, T-04, T-18, T-20, and WEL-01) due to a laboratory error that resulted in the disposal of the April 2023 PCB Aroclor samples from these wells prior to their analysis.
- In August 2023, samples and field measurements were collected from new monitoring well T-09-R, which replaced monitoring well T-09 in July 2023 after well integrity of T-09 was found to be compromised in March 2023 (Solutia, 2023). Construction specifications for replacement well T-09-R are provided in Appendix A.

#### 3.2.1 Groundwater Elevation Measurements

Prior to groundwater sampling, groundwater levels were measured in wells from which samples were to be collected and from other monitoring wells and piezometers located throughout and surrounding OU-3. Measurements were completed on 10 and 11 April and 16 October 2023, using electronic water level indicators having an accuracy of 0.01 feet. Groundwater elevations were tabulated (see Table 4) and used to construct potentiometric surface contour maps for the Shallow Residuum as discussed in Section 4.1 (see Figures 7a and 7b).

Figure 2a indicates the monitoring well network as it existed in April 2023 (with well T-09) and Figure 2b indicates the monitoring well network as it existed in October 2023 (with replacement well T-09-R).

#### 3.2.2 Groundwater Sample Collection

##### 3.2.2.1 Well Purging and Sampling

Monitoring wells were purged, and samples were collected, using low-flow procedures as specified in the applicable sampling and analysis plans (Solutia, 2015a; 2018). Wells sampled as part of the RCRA Groundwater Detection Monitoring and RCRA Groundwater Corrective Action Monitoring programs, along with CERCLA Remedial Action monitoring well T-09-R, are equipped with dedicated bladder pumps used for both purging and sampling. In all remaining wells sampled as part of the CERCLA Remedial Action, portable bladder pumps are used for both purging and sampling. The portable bladder pumps are decontaminated, and new, unused bladders are installed before use at each well.

Wells were purged at a rate of 0.1 to 0.4 liters per minute to produce minimal drawdown. Field indicator parameters (temperature, pH, specific conductance, turbidity, dissolved oxygen, and redox potential) were recorded until measurements stabilized to within specified ranges. Purge water was treated using granular activated carbon and discharged into the facility decontamination pit, which discharges to the facility equalization system and then to the Anniston publicly owned treatment works. Table 3 summarizes the values measured after stabilization and immediately prior to collecting the samples.

### *3.2.2.2 Laboratory Analyses*

Groundwater samples were collected in method-specified containers and shipped under chain-of-custody control to Eurofins TestAmerica Laboratories, Inc. in Savannah, Georgia. Samples were analyzed for the COCs listed on Table 2. Trip blanks, field blanks, equipment blanks, field duplicates, and matrix spike/matrix spike duplicate pairs were collected as described in the Data Validation Summary included as Appendix F. Complete laboratory reports and their respective data evaluation checklists are provided in Appendix H.

### *3.2.2.3 Sample Filtration*

Sampling procedures for groundwater monitoring conducted under RCRA specify filtration of PCB and metals samples using a 0.1-micron filter (Solutia, 2018), while CERCLA procedures specify a 2-micron filter (Solutia, 2015). Because 2-micron filters are not readily available commercially and because some CERCLA wells are also part of the RCRA monitoring program, all sample filtration for the 2023 monitoring program was conducted using 0.1-micron filters. For CERCLA-related performance assessment, including comparison of sample results to CERCLA Remediation Goals and concentration trend analyses for CERCLA wells, only the results for unfiltered samples are utilized. Results for both unfiltered and filtered samples are provided in tables and figures.

## 4.0 EVALUATION OF GROUNDWATER MONITORING RESULTS

### 4.1 Groundwater Flow Rate and Direction

Potentiometric surface maps have been prepared for the Shallow Residuum unit using groundwater measurements collected in April 2023 and October 2023 (see Figures 7a and 7b, respectively). Consistent with historical trends, most groundwater elevations were approximately 2 to 10 feet higher in April than in October 2023.

Both April and October 2023 groundwater gradients are consistent with those presented in previous annual groundwater monitoring reports and indicate similar groundwater flow directions and seepage velocities.

#### 4.1.1 Shallow Residuum

Groundwater within the Shallow Residuum flows in a general north to northeasterly direction under a hydraulic gradient of approximately 0.03 (see Figures 7a and 7b). Based on previous aquifer testing, the geometric mean hydraulic conductivity of the Shallow Residuum is approximately  $1.5 \times 10^{-2}$  feet per day ( $5.4 \times 10^{-6}$  centimeters per second; Solutia, 2007). The effective porosity of the residuum is estimated at 20% (Solutia, 2007). The groundwater seepage velocity within the Shallow Residuum can be calculated using Darcy's Law (Freeze and Cherry, 1979) shown in the following equation.

$$V_s = \frac{Ki}{N_e}$$

Where:  $V_s$  = seepage velocity,  $K$  = hydraulic conductivity,  $i$  = hydraulic gradient, and  $N_e$  = effective porosity. Based on the inputs above, the seepage velocity for the Shallow Residuum is calculated at approximately 1 foot per year. Note that transport of organic compounds would be slower than this calculated velocity due to sorption onto naturally occurring organic material within the groundwater-bearing unit.

### 4.2 Groundwater Quality

The overall results of the groundwater monitoring conducted in 2023 indicate that detected COCs and respective concentrations are generally consistent with previous results. A summary of COCs detected during the 2023 groundwater monitoring events is presented in this section and on Table 5. The table indicates those wells which were sampled in accordance with the RCRA Groundwater Detection Monitoring Program, the RCRA Corrective Action Monitoring Program, and the CERCLA Remedial Action Program. Note that samples were collected and analyzed from the following four wells to satisfy the requirements of the latter two programs.

- **Well OW-08A:** Sampled for PCB Aroclors, cobalt, mercury, chlorobenzene, o, o, o-Triethyl phosphorothioate, 4-nitrophenol, 1,2-dichlorobenzene, 1,4-dichlorobenzene, parathion, and tetraethyldithiopyrophosphate per the RCRA Corrective Action Monitoring Program and indeno(1,2,3-cd)pyrene and manganese per the CERCLA Remedial Action Program.
- **Well OW-16A:** Sampled for PCB Aroclors, cobalt, mercury, chlorobenzene, o, o, o-Triethyl phosphorothioate, 4-nitrophenol, 1,2-dichlorobenzene, 1,4-dichlorobenzene, parathion, and

tetraethyldithiopyrophosphate per the RCRA Corrective Action Monitoring Program and 1,2,4-trichlorobenzene and manganese per the CERCLA Remedial Action Program.

- **Well OW-21A:** Sampled for PCB Aroclors, cobalt, mercury, chlorobenzene, o, o, o-Triethyl phosphorothioate, 4-nitrophenol, 1,2-dichlorobenzene, 1,4-dichlorobenzene, parathion, and tetraethyldithiopyrophosphate per the RCRA Corrective Action Monitoring Program and manganese per the CERCLA Remedial Action Program. Based on concentrations of these COCs in OW-21A, the area in the vicinity of well OW-21A was designated as a Corrective Action area addressed by the CERCLA Remedial Action Program.
- **Well MW-14:** Sampled for PCB Aroclors, cobalt, mercury, chlorobenzene, o, o, o-Triethyl phosphorothioate, 4-nitrophenol, 1,2-dichlorobenzene, 1,4-dichlorobenzene, parathion, and tetraethyldithiopyrophosphate per the RCRA Corrective Action Monitoring Program and manganese per the CERCLA Remedial Action Program.

Groundwater monitoring data have been compared to applicable RCRA Concentration Limits or the CERCLA Remediation Goals, and concentrations exceeding applicable limits are highlighted on Table 5.

#### 4.2.1 WMA I Groundwater Detection Monitoring

No COCs were detected in the background well (MW-01B) or any point of compliance well (i.e., MW-11A, MW-12A, MW-13A-R) above the RCRA Concentration Limits, indicating that no release has occurred from the unit (see Figure 8).

#### 4.2.2 WMA II and SWMU 1 Groundwater Corrective Action Monitoring

Of the 13 wells monitored at WMA II and SWMU 1, including the background well (MW-01B), nine wells evidenced no detections greater than the RCRA Concentration Limits for any analyte. Concentrations in groundwater samples were less than RCRA Concentration Limits for all volatile organic compounds (VOCs) and metals analyzed (see Figures 9 and 13). The monitoring locations and COCs that exceeded their respective RCRA Concentration Limits in the WMA II and SWMU 1 wells are summarized in Exhibit 1 below.

**Exhibit 1. Summary of RCRA Concentration Limit Exceedances**

Well	Unit	COC Exceeding RCRA Concentration Limit
OW-08A	SWMU 1	Total PCBs (unfiltered)
OW-16A	SWMU 1	Total PCBs (unfiltered)
MW-20A	WMA II	Pentachlorophenol
OW-21A	WMA II	Total PCBs (unfiltered) 4-Nitrophenol o, o, o-Triethyl phosphorothioate Parathion

As noted above, well OW-21A is monitored per the RCRA Corrective Action Monitoring Program, while the OW-21A area is addressed by the CERCLA Remedial Action Program. Results of OW-21A, along with results from other wells monitored in this area are discussed in detail in section

4.2.3 in context of the CERCLA Remedial Action Program. Specific results and notable differences from previous monitoring events are discussed in more detail below.

- **PCB Results in Filtered Samples:** Total PCB Aroclors were less than the applicable RCRA Concentration Limit of 0.5 micrograms per liter (ug/L) in all eight filtered samples (see Figure 11). Overall, the sampling results demonstrate that PCB detections in groundwater are primarily associated with entrained suspended solids that are typically removed through filtration.
- **CERCLA Results for Well OW-16A:** As noted above, samples collected from OW-16A are analyzed for 1,2,4-trichlorobenzene, which has been assigned a Remediation Goal under CERCLA but not a Concentration Limit under RCRA. The concentration of 1,2,4-trichlorobenzene at well OW-16A exceeded the CERCLA Remediation Goal as discussed in section 4.2.3.3. Based on the Mann-Kendall statistical trend analysis, a stable trend for this COC has been established.
- **CERCLA Results for Well OW-21A:** As noted above, samples collected from OW-21A are analyzed for manganese, which has been assigned a Remediation Goal under CERCLA but not a Concentration Limit under RCRA. The concentration of manganese at well OW-21A exceeded the CERCLA Remediation Goal as discussed in section 4.2.3.3. Based on the Mann-Kendall statistical trend analysis, no trend for this COC has been established.
- **Notable Differences from Prior Monitoring Events:** At monitoring well OW-22, concentrations of Total PCB Aroclors were less than the reporting limit for the first time since April 2017. Based on Mann-Kendall statistical analysis, no trend has been established for Total PCBs at this well over the entire monitoring record, following a previous “increasing” trend (see Figure 11 and Appendix G, Figure G.4).

#### 4.2.3 CERCLA Performance Verification Sampling

Results from the Spring 2023 groundwater sampling as conducted in accordance with the PSVP SA QAPP (Solutia, 2015a) are summarized below and on Figures 14 through 17. The monitoring locations and COCs that exceeded their respective CERCLA Remediation Goals at OU-3 are summarized in Exhibit 2 below.

**Exhibit 2. Summary of CERCLA Remediation Goal Exceedances**

Well	Area	COC Exceeding CERCLA Remediation Goal
OW-21A	OW-21A	Total PCBs 4-Nitrophenol Parathion Manganese
T-04	OW-21A	Total PCBs
OW-10	OW-10	Beryllium Manganese Mercury
T-20	OW-10	Manganese
OWR-11	Other Areas Within OU-3	Total PCBs Cobalt Manganese
OWR-13	Other Areas Within OU-3	Total PCBs
OWR-14D	Other Areas Within OU-3	Total PCBs
OWR-15D	Other Areas Within OU-3	Total PCBs
OW-16A	Other Areas Within OU-3	Total PCBs 1,2,4-Trichlorobenzene
T-18	Other Areas Within OU-3	Total PCBs

Specific results and notable differences from previous monitoring events are discussed in more detail in the following sections.

**4.2.3.1 Well OW-21A Corrective Action Area**

- **VOCs:** All concentrations of VOCs were less than the CERCLA Remediation Goals for all wells in the well OW-21A Corrective Action Area (see Figure 14).
- **Pesticides and Semi-Volatile Organic Compounds (SVOCs):** At well OW-21A, concentrations of one pesticide (parathion) and one SVOC (4-nitrophenol) exceeded CERCLA Remediation Goals (see Figure 15). The concentration of parathion at well OW-21A is decreasing according to Mann-Kendall statistical analysis (see Appendix G, Figure G.6). The concentration of 4-nitrophenol at well OW-21A is stable according to Mann-Kendall statistical analysis, and “probably decreasing” considering the last 20 sampling events (see Appendix G, Figure G.1).
- **PCB Aroclors:** PCB Aroclors were detected in groundwater samples collected from two of the four wells sampled in the well OW-21A Corrective Action Area (OW-21A and T-04; see Figure 16). At well T-04, located hydraulically upgradient of OW-21A, total PCBs were reported at a concentration of 26 ug/L. Based on Mann-Kendall statistical trend analysis, no trend for PCBs at well T-04 has been established (see Figure G.8(A) of Appendix G). At well OW-21A, total PCBs were reported at a total concentration of 59 ug/L. Mann-Kendall trend analysis continues to indicate a “decreasing” concentration trend for PCBs at OW-21A (see Figure G.4 of Appendix G). PCBs were not detected in monitoring well T-09-R. T-09-R was installed in July 2023 to replace monitoring well T-09, which was found to have compromised well integrity (Solutia, 2023).

- **Metals:** Manganese at well OW-21A exceeded CERCLA Remediation Goals (see Figure 17). Based on the Mann-Kendall statistical trend analysis, no trend for this COC has been established (see Figure G.12 of Appendix G).

#### 4.2.3.2 Well OW-10 Corrective Action Area

- **VOCs:** All concentrations of VOCs were less than the CERCLA Remediation Goals for all wells in the well OW-10 Corrective Action Area (see Figure 14).
- **PCB Aroclors:** All concentrations of PCB Aroclors were less than the CERCLA Remediation Goals for all wells in the well OW-10 Corrective Action Area (see Figure 16).
- **Metals:** At well OW-10, beryllium, manganese, and mercury concentrations exceeded their respective CERCLA Remediation Goals (see Figure 17). In the downgradient well T-20, manganese concentrations also exceeded the CERCLA Remediation Goal. Mann-Kendall statistical trend analysis indicates that concentrations of manganese are decreasing at T-20 and probably decreasing at OW-10, that concentrations of beryllium are stable at OW-10, and that no trend has been established for concentrations of mercury at OW-10 (see Figures G.11 – G.13 of Appendix G).

#### 4.2.3.3 Other Areas Within OU-3

Nine wells are sampled across OU-3 under the CERCLA Remedial Action Program for PCB Aroclors, PCB Homologs, and metals. As discussed in section 4.2, the RCRA Corrective Action Monitoring wells OW-16A and OW-08A are also sampled for one VOC and one SVOC, respectively, under the CERCLA Remedial Action Program. Results for sampling of these eleven wells within OU-3 are summarized below:

- **VOCs:** A concentration of 410 ug/L was reported for 1,2,4-trichlorobenzene at well OW-16A, which exceeded the CERCLA Remediation Goal of 70 ug/L (see Figure 14). Mann-Kendall statistical trend analysis indicates that concentrations of 1,2,4-trichlorobenzene at well OW-16A are stable (see Figures G.7 of Appendix G).
- **SVOCs:** Indeno(1,2,3-cd)pyrene, the only compound analyzed at well OW-08A under the CERCLA Remedial Action program, was not detected (see Figure 15).
- **PCB Aroclors:** The concentrations of total PCB Aroclors were less than the reporting limit at five wells (i.e., WEL-01, WEL-04, OWR-03S, OWR-14D and T-06). Reported concentrations of total PCB Aroclors in unfiltered samples exceeded the CERCLA Remediation Goal of 0.5 ug/L at the other four wells (i.e., OWR-11, OWR-13, OWR-15D, and T-18; see Figure 16). Mann-Kendall statistical trend analysis indicates that concentrations of PCB Aroclors are stable at wells OWR-11 and OWR-13 and that no trend has been established for concentrations of PCB Aroclors at wells OWR-15D and T-18 (see Figure G.8 of Appendix G).
- **PCB Homologs:** Reported concentrations of total PCB Homologs in unfiltered samples exceeded the CERCLA Remediation Goal of 0.5 ug/L at monitoring wells OWR-13, OWR-14D (in the duplicate), and T-18 (see Figure 16 and Table 5). Mann-Kendall statistical trend analysis indicates that concentrations of PCB Homologs are decreasing at well T-18 and probably decreasing at well OWR-14D, and that no trend has been established for concentrations of PCB Homologs at well OWR-13 (see Figure G.9 of Appendix G).
- **Metals:** Concentrations of cobalt and manganese were less than CERCLA Remediation Goals in all but one well, OWR-11 (see Figure 17). Mann-Kendall statistical trend analysis indicates that concentrations of cobalt and manganese are decreasing at well OWR-11 (see Figures G.10 and G.12 of Appendix G).

## 5.0 EVALUATION OF CORRECTIVE ACTION SYSTEMS

### 5.1 Capture of Affected Groundwater

- **RCRA Groundwater Corrective Action:** Operation of IWs has successfully controlled migration of affected groundwater as demonstrated by cones of depression maintained by the interceptor wells at WMA II and SWMU 1 (see Figures 7a and 7b).
- **CERCLA RA:** In the Corrective Action Areas near wells OW-21A and OW-10, recovery of impacted groundwater occurs throughout the year (see Table 6), with COCs detected in the influent to the treatment system.

### 5.2 Corrective Action Systems Operation

A summary of the operation of the corrective action systems during calendar year 2023 is provided below:

- **WMA II, New Limestone Bed:** Groundwater was recovered from a total of 11 interceptor wells located immediately downgradient of WMA II (i.e., wells IW-16 through IW-25 and DW-01; see Figures 2a and 2b). Volumes of recovered groundwater are measured for the entire well network and totaled more than 0.36 million gallons during 2023 (see Table 6). Water is collected in a tank for subsequent on-site management.
- **SWMU 1, South Landfill:** More than 0.64 million gallons were recovered in 2023 from the 11 interceptor wells located along the western and northern sides of SWMU 1 (i.e., wells IW-02, IW-05 through IW-08, and IW-10 through IW-14A; see Table 6 and Figures 2a and 2b). Recovered groundwater is treated by filtration and granular activated carbon (GAC) in Carbon Treatment System (CTS) #3 (except for well IW-14A, which discharges to CTS #2 for treatment). The treated groundwater from CTS #3 is discharged to the Anniston Water Works and Sewer Board (AWWSB) sewer system in accordance with State Indirect Discharge (SID) Permit Number IU350800048 (effective October 1, 2018). The volume of groundwater recovered by the system in 2023 is within the range of the previous five-year period when between 0.3 and 0.8 million gallons were recovered each year.
- CTS #3 also treats water collected by the Cell 3E seep collection and conveyance system. In 2023, seep water treated at CTS #3 totaled approximately 0.44 million gallons (this volume is in addition to the volume of groundwater recovered by the SWMU 1 IWs).
- **Well OW-21A Corrective Action Area:** A total of more than 0.85 million gallons of groundwater was recovered from wells IW-26 and IW-27 located downgradient of well OW-21A (see Table 6 and Figures 2a and 2b). Water is treated by filtration and GAC in CTS #1, and the treated groundwater is discharged to the AWWSB sewer system per the SID permit (effective October 1, 2018).
- **Well OW-10 Corrective Action Area:** Approximately 121,500 gallons of groundwater were recovered from wells IW-28 and IW-29 located downgradient of well OW-10 (see Table 6 and Figures 2a and 2b). Water is treated by filtration and GAC in CTS #2, and the treated groundwater is discharged to the AWWSB sewer system per the SID permit (effective October 1, 2018).

### 5.3 Groundwater Monitoring Concentration Trend Analyses

To evaluate the effectiveness of the Corrective Action and Remedial Action systems for reducing COC concentrations in groundwater, trends of COC concentrations versus time have been analyzed. The Mann-Kendall statistical analysis was employed for this purpose.

### 5.3.1 Description of the Mann-Kendall Test

The Mann-Kendall test is a non-parametric statistical procedure that is well suited for analyzing trends in data over time (Gilbert, 1987; Aziz et al., 2003; Connor, 2014). The Mann-Kendall test can be viewed as a non-parametric test for zero slope of the first-order regression of time-ordered concentration data versus time. The Mann-Kendall test does not require any assumptions as to the statistical distribution of the data (e.g. normal, lognormal, etc.) and can be used with data sets which include irregular sampling intervals and missing data. The Mann-Kendall test is designed for analyzing a single groundwater constituent; multiple constituents are analyzed separately.

### 5.3.2 Interpretation of Mann-Kendall Test Results

The Coefficient of Variation (COV) is a statistical measure of how the individual data points vary about the mean value. Values less than or near 1.00 indicate that the data form a relatively close group about the mean value. Values larger than 1.00 indicate that the data show a greater degree of scatter about the mean.

The Mann-Kendall statistic (S) measures the trend in the data. Positive values indicate an increase in constituent concentrations over time, whereas negative values indicate a decrease in constituent concentrations over time. The strength of the trend is proportional to the magnitude of the Mann-Kendall Statistic (i.e., large magnitudes indicate a strong trend). The “Confidence in Trend” is the statistical confidence that the constituent concentration is increasing (S>0) or decreasing (S<0). The “Concentration Trend” for each COC at each well is determined according to the decision matrix shown in Exhibit 3 below.

**Exhibit 3. Mann-Kendall Analysis Decision Matrix**

Mann-Kendall Statistic	Confidence in Trend	Concentration Trend
S > 0	> 95%	Increasing
S > 0	90 - 95%	Probably Increasing
S > 0	< 90%	No Trend
S ≤ 0	< 90% and COV ≥ 1	No Trend
S ≤ 0	< 90% and COV < 1	Stable
S < 0	90 - 95%	Probably Decreasing
S < 0	95%	Decreasing

### 5.3.3 Mann-Kendall Analysis of OU-3 Groundwater Monitoring Data

The majority of the COCs monitored at OU-3 are either not detected above laboratory detection limits or are present at concentrations below applicable remedial limits; therefore, for most COCs, corrective action or remediation goals have already been achieved. For those COCs and monitoring locations where concentrations exceed remedial criteria, the Mann-Kendall trend analysis has been applied to evaluate overall plume stability and corrective action effectiveness for groundwater. The Mann-Kendall trend analysis has been applied to all COCs with concentrations that exceeded remedial criteria between 2017-2023 as summarized in Exhibit 4 below.

As summarized in Exhibit 4, a total of ten COCs at 16 monitoring locations have had concentrations exceeding remedial criteria between 2017 and 2023, resulting in trend calculation for 32 COC/well combinations. Where a trend has been established using the Mann-Kendall statistical analysis, 17 of the 32 trend results were Stable, Probably Decreasing, or Decreasing, while only 1 of the 32 trend results were Probably Increasing or Increasing. For 9 of the 32 trend

results, no trend has been established due to low statistical confidence in the trend and/or high variability in the monitoring data. Seven of the 9 “no trend” results are associated with CERCLA monitoring wells, which have had seven monitoring events (a minimum of four monitoring events is required to calculate a trend). Five additional trend results were not calculated due to a majority of non-detect results.

Three trends for constituents exceeding the RCRA Concentration Limits changed relative to the previously calculated trends: Total PCBs (unfiltered) at OW-22 changed from “increasing” to “no trend”, Total PCBs (unfiltered) at OW-15 changed from “increasing” to “probably increasing”, and 4-nitrophenol at OW-21A changed from “stable” to “probably decreasing”. These trend changes are all due to declining concentrations measured in 2023.

Six trends for constituents exceeding the CERCLA Remediation Goals changed relative to the previously calculated trends: Total PCBs at T-04 changed from “probably increasing” to “no trend”, Total PCBs at T-06 changed from “stable” to “probably decreasing”, manganese at OW-10 changed from “stable” to “probably decreasing”, 1,2,4-TCB at OW-16A changed from “no trend” to “stable”, Total PCBs at OWR-13D changed from “no trend” to “stable”, and Total PCBs at OWR-14D changed from “stable” to “no trend”. With exception of Total PCBs at OWR-14D, these trend changes are due to declining concentrations measured in 2023.

As previously reported, the increasing trend at well T-09 for Total PCBs calculated following the 2022 monitoring event was found to be associated with compromised well integrity (Solutia, 2023). No PCBs were detected in the replacement monitoring well T-09-R in August 2023. A new trend for replacement well T-09-R will be calculated after the minimum of four sampling events have been completed for this well.

### Exhibit 4. Results of Mann-Kendall Statistical Analysis

Unit or Corrective Action Area/Well	Constituent of Concern	Mann-Kendall Statistic (S)	Confidence Factor	Concentration Trend
<b>WMA II</b>				
MW-20A	Pentachlorophenol	-381	>99.90%	<b>Decreasing</b>
OW-22	Total PCBs	56	89.9%	<i>No Trend</i>
	Total PCBs (Filtered)	--	--	<b>Not Detected</b>
<b>SWMU 1</b>				
OW-08A	Total PCBs	-105	92.1%	<b>Prob. Decreasing</b>
	Total PCBs (Filtered)	--	--	<b>Not Detected</b>
OW-15	Total PCBs	103	91.7%	<i>Prob. Increasing</i>
	Total PCBs (Filtered)	--	--	<b>Not Detected</b>
OW-16A	Total PCBs	-45	72.5%	<b>Stable</b>
	Total PCBs (Filtered)	--	--	<b>Not Detected</b>
	1,2,4-TCB	0	37.9%	<b>Stable</b>
<b>OW-21A Area</b>				
OW-21A	4-Nitrophenol	-49	94.0%	<b>Prob. Decreasing</b>
	O,O,O-TEPP	-54	94.5%	<b>Prob. Decreasing</b>
	Total PCBs	-90	99.7%	<b>Decreasing</b>
	Total PCBs (Filtered)	--	--	<b>Not Detected</b>
	Parathion	-74	98.1%	<b>Decreasing</b>
	Manganese	6	76.4%	<i>No Trend</i>
T-04	Total PCBs	9	88.1%	<i>No Trend</i>
<b>OW-10 Area</b>				
OW-10	Total PCBs	-8	84.5%	<i>No Trend</i>
	Manganese	-10	90.7%	<b>Prob. Decreasing</b>
	Mercury	5	71.9%	<i>No Trend</i>
	Beryllium	-7	80.9%	<b>Stable</b>
T-20	Total PCBs	5	71.9%	<i>No Trend</i>
	Manganese	-19	99.9%	<b>Decreasing</b>
<b>Other Areas Within OU-3</b>				
OWR-11	Total PCBs	-3	61.4%	<b>Stable</b>
	Cobalt	-17	99.5%	<b>Decreasing</b>
	Manganese	-14	97.5%	<b>Decreasing</b>
OWR-13	Total PCBs	-1	50.0%	<b>Stable</b>
OWR-14D	Total PCBs	-4	66.7%	<i>No Trend</i>
OWR-15D	Total PCBs	1	50.0%	<i>No Trend</i>
T-06	Total PCBs	-10	90.7%	<b>Prob. Decreasing</b>
T-18	Total PCBs	3	61.4%	<i>No Trend</i>
WEL-01	Total PCBs	-5	71.9%	<b>Stable</b>

Notes:

1. See Appendix G for complete Mann-Kendall results.
2. O,O,O-TEPP = o, o, o-Triethyl phosphorothioate
3. 1,2,4-TCB = 1,2,4-Trichlorobenzene; only analyzed in OW-16A per CERCLA
4. Not Detected = More than 75% of the sample results for this constituent in this well are non-detect, so a trend was not calculated to avoid calculating a trend on detection limits.

## 5.4 Conclusions

At WMA II and SWMU 1, concentration trends of all COCs exceeding the respective RCRA Remedial Goals evidence decreasing, probably decreasing, or stable conditions, with one well exhibiting no trend due to variability. Only a single well in the RCRA monitoring network, OW-15, is calculated to have a “probably increasing” trend for Total PCBs; however, as discussed in section 5.3.3, PCBs have not been detected in this well since 2020 and filtered samples have not shown any PCB detections. Overall, the calculated trends are generally consistent with the trends previously presented, with changes noted indicating declining concentrations.

Trends for all monitoring wells in the CERCLA Corrective Action Areas evidence decreasing, probably decreasing, or stable conditions, with a few wells exhibiting no trend due to variability. Overall, the calculated trends are generally consistent with the trends previously presented, with most changes noted indicating declining concentrations.

In summary, the trend data indicate that the Corrective Action Systems and the Remedial Action are both progressing toward applicable cleanup limits by achieving predominantly declining or stable concentrations of COCs in groundwater.

**Notes:**

- Well locations are shown on Figure 2.
- Samples collected in April, June, Aug., and Oct. 2023 analyzed by GSI Environmental Inc., Houston, Texas using Aqua Troll 600 and Hanna HI 98703 instruments.
- Additional sampling took place in June 2023 as part of the Spring 2023 event due to laboratory loss of April 2023 samples.
- Well T-09 was replaced with T-09-R in July 2023 and sampled in August 2023.
- > = greater than  
 °C = Degrees Celsius  
 mg/L = Milligrams/liter  
 mV = Millivolts  
 NTU = Nephelometric Turbidity Unit  
 ORP = Oxidation reduction potential  
 µmhoS/cm = Micromhos/centimeter

Notes:

- Well locations are shown on Figure 2.
- April 2023 depths to water and total depths measured on 10 and 11 April 2023.
- October 2023 depths to water and total depths measured on 16 October 2023.
- ft bgs = Feet below ground surface  
 ft btoc = Feet below top of casing  
 ft msl = Feet above mean sea level  
 NM = Not Measured  
 P&A = Plugged and Abandoned prior to Oct. 2023, so depth to water and total depth were not measured.  
 -- = Well T-09-R was installed after the April sampling event, so no measurement was possible.
- Total depth (TD) was most recently measured in most wells in April or October 2023. T-09-R TD was measured in August 2023. IW-22 through IW-29 TDs were most recently measured in October 2021.

Notes:

- Well locations are shown on Figure 2.
- ft = Feet  
 ft bgs = Feet Below Ground Surface  
 ft btoc = Feet Below Top of Casing  
 ft msl = Feet Above Mean Sea Level  
 NA = Not Available  
 NS = Not Surveyed  
 RFI = Resource Conservation Recovery Act (RCRA) Facility Investigation  
 SSSMA = South Staging and Soil Management Area
- Northing and Easting reported for State Plane Alabama East (FIPS 0101 Feet)
- Stick-up estimated based on ground surface elevation.
- Ground surface around well may have been modified after well installed. Ground surface elevation reflects most recent measured elevation.
- Stick-up measurement based on well construction logs or difference between top of casing and ground elevation where indicated.
- Stick-up measurement taken on October 2007, except for T-7 to T-12 (October 2008) and T-13 to T-15 (August 2010).
- Well plugged and abandoned between June and September 2021.
- Well plugged and abandoned October 2022.
- Well plugged and abandoned July 2023.

Stabilization requirements, per SOP A-10, are achieved when water is free of visible sediment and three successive readings every 3 to 5 minutes to include:

Temperature:	+/- 3 °C
pH:	+/- 0.1 Standard Units
Specific Conductance:	+/- 3%
ORP:	+/- 10 mV
Dissolved Oxygen:	< 0.5 mg/L or +/- 10% if DO is greater than 0.5 mg/L
Turbidity:	< 10 NTU or +/- 10% if turbidity is greater than 10 NTUs

Notes:  
 pump set @ 32.5 ft btoe  
 CPM 4  
 5 sec discharge  
 ~ 50 ft pressure

850	97.42	125	16.48	7.23	6.42	0.29	4.65	195.6	✓

Stabilization requirements, per SOP A-10, are achieved when water is free of visible sediment and three successive readings over 3 to 5 minutes to include:

Temperature:	+/- 3 °C
pH:	+/- 0.1 Standard Units
Specific Conductance:	+/- 3%
ORP:	+/- 10 mV
Dissolved Oxygen:	< 0.5 mg/L or +/- 10% if DO is greater than 0.5 mg/L
Turbidity:	< 10 NTU or +/- 10% if turbidity is greater than 10 NTUs

Notes:

White powder observed on 20 ft of tubing <sup>1</sup>/<sub>3</sub> top 1/3 of Pump. Sample taken in a plastic bottle w/ out preservative.  
 Top of pump: 107.50 ft bblc

 Project: Ammonia April Monitoring Event Client: Solutra Page: 1 of 1  
 Well ID: MW-12A Begin Time: 1749 End Time: 1848  
 Weather: Sunny Site Conditions: good, rocky  
 COC ID #1: MW-12A = Original Sample COC ID #2: - = Duplicate  
 COC ID #3: - = Field Blank COC ID #4: - = MS/MSD  
 COC ID #5: - = Original Sample (Filtered) COC ID #8: - = Duplicate (Filtered)

SAMPLING DATA / FIELD PARAMETERS

Temperature: 17.14 Color: Clear  
 (°F / °C) Appearance: no odor  
 pH: 7.38 DO: 3.84  
 (Standard Units) (mg/L)  
 Turbidity: 1.19 ORP: 127.2  
 (NTU) (mV)  
 Specific Conductivity: 0.36  
 (µmhos/cm)  
 Sampling Method/  
 Material: master flux, low flow, dedicated bladder pump

CONTAINER & ANALYSES DESCRIPTION

COLLECTED	CONTAINER & ANALYSES	NOTES
0	40 mL glass vial with HCl for VOA analysis (8260)	
2	1 L glass vial with no preservative for SVOC analysis (8270)	
2	1 L glass vial with no preservative for Organophos. Pest. analysis (8141)	
2	1 L glass vial with no preservative for PCB analysis	
0	1 L glass vial with no preservative for PCB analysis (filtered)	
0	250 mL plastic with HNO3 for metals analysis (see COC for exact metals)	
0	250 mL plastic with HNO3 for metals analysis (filtered)	

REMARKS

Condition of well: fair, lots of bug activity but ports have covers

PARAMETER LIST

VOCs (8260)

- Chlorobenzene: YES /  NO  
 1,2,4-Trichlorobenzene: YES /  NO  
 Trichloroethene: YES /  NO

SVOCs (8270)

- 1,2-Dichlorobenzene YES /  NO  
 1,4-Dichlorobenzene YES /  NO  
 Indeno(1,2,3-cd)pyrene YES /  NO  
 4-Nitrophenol  YES /  NO  
 Pentachlorophenol  YES /  NO  
 2,4,6-Trichlorophenol  YES /  NO  
 o,p,o-Triethylphosphorothioate  YES /  NO

PCBs (8082)

- Arochlors  YES /  NO  
 Homologs  YES /  NO

PESTICIDES (8141)

- Tetraethylthiopyrophosphate /  
 Sulfotep  YES /  NO  
 Parathion  YES /  NO

METALS (8010)

- Beryllium YES /  NO  
 Cobalt YES /  NO  
 Manganese YES /  NO

MERCURY (7470)

- Mercury YES /  NO

**2023 ANNUAL GROUNDWATER DETECTION MONITORING AND  
CORRECTIVE ACTION EFFECTIVENESS REPORT**

**Solutia Inc. Anniston, Alabama**

RCRA Post-Closure Permit ALD 004 019 048  
Consent Decree Docket No. 1:02-ec-0749-KOB

**APPENDIX F**

Appendix F. Data Validation

## **APPENDIX F DATA VALIDATION**

Solutia Inc., Anniston, Alabama  
RCRA Post-Closure Permit No. ALD 004 019 048  
Consent Decree Docket No. 1:02-ec-0749-KOB

### **1.0 EXECUTIVE SUMMARY**

#### **1.1 Results of Data Validation**

This data validation report provides the results of an evaluation of data from 14 data packages issued by TestAmerica Laboratories, Inc. (TestAmerica), located in Savannah, Georgia. The data packages report the analyses of groundwater samples collected in the Spring (April, June, August) and Fall (October) 2023 groundwater monitoring events at the Solutia Inc. facility located in Anniston, Alabama. Additional sampling events were conducted in June and August to complete the Spring 2023 event due to a laboratory error which resulted in premature disposal of 12 samples and the pending replacement of monitoring well T-09, respectively.

As further detailed in this data validation report, review of the analytical data received from the laboratory have verified that the data are suitable for the intended purpose of i) verifying groundwater conditions to evaluate whether a release from WMA I has or has not occurred; ii) monitoring concentrations of constituents of concern (COCs) in groundwater; and iii) evaluating the effectiveness of corrective action efforts being implemented at WMA II, SWMU 1, the well OW-21A Corrective Action Area, and the OW-10 Corrective Action Area.

#### **1.2 Summary of Groundwater Sampling Program**

The 2023 groundwater sampling program at the Solutia Anniston facility included collection and analysis of a total of 63 samples in April, 13 samples in June, 4 samples in August, and 10 samples in October, including field duplicates, equipment blanks, purge water, and trip blanks (see Table F.1 for a listing of sample identifications cross-referenced to laboratory identifications). Samples were analyzed for one or more of the following COCs:

- Volatile Organic Compounds (VOCs) by SW-846 Method 8260B
- Semi-volatile Organic Compounds (SVOCs) by SW-846 Method 8270D
- Pentachlorophenol by SW-846 8270D SIM
- Polychlorinated Biphenyls (PCB Aroclors) by SW-846 Method 8081B/8082A
- Polychlorinated Biphenyls (PCB homologs) by EPA Method 680
- Organophosphorous Pesticides by SW-846 Method 8141B
- Metals (i.e., cobalt, beryllium, and/or manganese) by SW-846 Method 6010C
- Mercury by SW-846 Method 7470A

#### **1.3 Analytical Results**

Detected analytes (i.e., reported greater than the laboratory reporting limit) for the April, June, August, and October 2023 sampling events are summarized in Table 5 in the main

body of this Annual Groundwater Monitoring Report. Historical results for groundwater sampling for the last five years (i.e., 2019 to 2023) are provided in Appendix E. Data acquired during 2023 included in Table 5 and Appendix E have been qualified as described in this data validation report. Complete laboratory reports and their respective data validation checklists are provided in Appendix H.

## 2.0 DATA VALIDATION PROCEDURES

### 2.1 Basis for Data Validation

The data validation and review detailed in this appendix has been conducted in accordance with applicable project and site-specific documents for the Solutia Anniston facility, as follows:

1. "Attachment 6.2: Quality Assurance Project Plan," in *RCRA Post-Closure Permit Renewal Application ALD 004 019 048*, Revision 1 (Solutia, Inc., 2018).
2. "OU-3 Performance Standards Verification Sampling and Analysis/Quality Assurance Project Plan" (PSVP; Solutia, 2015).

For simplicity, these documents will be referred to as the Sampling and Analysis Plan (SAP) in this appendix.

### 2.2 Data Quality Objectives

Analytical data have been evaluated with respect to data quality objectives (DQOs) specified in the SAP for representativeness, comparability, accuracy, precision, and completeness. Quality assurance/quality control (QA/QC) requirements for blanks, spikes, and duplicates (including matrix spikes/matrix spike duplicates; MS/MSDs), and calibrations are also provided in the SAP.

- **Representativeness** has been evaluated by verifying that groundwater samples have been collected from the locations specified in the SAP.
- **Comparability** has been evaluated by ensuring that standard sample collection, handling, and analytical procedures have been employed. The scope of this data quality analysis has involved review of the following:
  1. Completeness of laboratory data packages
  2. Chain-of-custody control and sample handling
  3. Holding times for sample preparation, extraction, and analysis
  4. Analytical methods used for sample analysis
- **Accuracy** has been evaluated by comparing the project-specific values for the recovery of spiked compounds, expressed as percent recovery, in applicable laboratory control samples, matrix spikes, surrogate spikes, and other spiked samples.

- **Precision** has been evaluated by comparing the project-specified relative percent difference (RPD) values to those calculated for duplicate samples, including laboratory control samples, matrix spike duplicates and field duplicates.

Matrix spike and duplicate results are meaningful when the matrix is obtained from the site being sampled. Therefore, only those QC issues noted for MS/MSD pairs prepared in the laboratory from samples collected from the Solutia site are discussed in this report.

- **Completeness** has been calculated as the percentage of total number of analytes that have met applicable DQO criteria with respect to the total number of analytes specified to be collected.

### 3.0 RESULTS OF DATA VALIDATION

A summary of the data evaluations and findings resulting in qualifications are presented below. Additional details regarding the data evaluation, findings, and qualifications may be found in the data validation checklists at the front of each lab report provided in Appendix H.

#### 3.1 Representativeness

- **Evaluation:** Samples specified by the SAP were collected at designated monitoring well locations in April, June, August, and October 2023. The Expanded Extraction System Performance monitoring well T-09, located downgradient of the OW-21A Corrective Action Area, was replaced with well T-09-R in July 2023. Sampling locations were specified in the SAP as being representative of the groundwater conditions at each location; therefore, the criterion of representativeness has been satisfied.
- **Findings:** Well T-09-R is constructed at the same location, design, and depth as the previous T-09. No sample results have been qualified on the basis of unrepresentative samples.

#### 3.2 Comparability

##### 3.2.1 Laboratory Data Packages

- **Evaluation:** 13 of the 14 data packages for the project are complete, providing results for the samples provided and analyzing the samples for the COCs specified on the chain-of-custody forms. Report 680-233701-1 did not provide PCB Aroclor results for 12 samples due to an error in sample placement by the laboratory resulting in disposal of the samples before extraction and analysis. These samples were collected during a subsequent resampling event in June 2023 and associated analytical results are reported in report 680-236362-1.
- **Findings:** No data have been qualified on the basis of insufficiencies in the laboratory data packages.

### 3.2.2 Chain-of-Custody Control and Sample Handling

- **Evaluation:**
  - i. Chain-of-Custody: Samples were evaluated for agreement with the chain-of-custody by the laboratory upon receipt. The paperwork was filled out properly.
  - ii. Sample Condition: Samples were received by the laboratory in good condition, having been collected in appropriate containers and preserved in the field, if applicable.
  - iii. Sample Temperatures: Sample receipt temperatures were within the acceptable criterion of 4°C +/- 2°C with the exception of the sample analytes 4-Nitrophenol, Parathion, and PCB Aroclors at T-10 collected in April 2023.
  - iv. Field Filtration: Samples were filtered in the field as specified in the SAP.
  - v. Field Performance: Appropriate field performance was met for all samples.
- **Findings:** Non-detect results for 4-Nitrophenol, Parathion, and PCB Aroclors at T-10 collected in April 2023 are qualified as estimated (UJ) in accordance with the *National Functional Guidelines for Organic Superfund Methods Data Review* (NFG; EPA, 2020b).

### 3.2.3 Holding Times for Sample Preparation, Extraction, and Analysis

- **Evaluation:** Samples for all chemicals of concern (COCs) were prepared and analyzed within the holding times specified in SW-846, except for analysis of PCB-1221 in sample OWR-15D collected in April 2023, analysis of chlorobenzene in sample OW-22 collected in April 2023, sample extraction for method 8141B in samples MW-01B, MW-11A, MW-12A, T-10, MW-14, OW-08A, and OW-21A collected in April 2023, and sample extraction for 8270D in MW-12A collected in April 2023.
- **Findings:** Findings based on hold time exceedances were qualified in accordance with the NFG (USEPA, 2020b) as described below. The detected PCB-1221 result in OWR-15D collected in April 2023 was qualified as estimated (J). The non-detect chlorobenzene result in OW-22 collected in April 2023 was qualified as estimated (UJ). The non-detect results for Tetraethyldithiopyrophosphate in MW-01B, MW-14, OW-08A, and OW-21A collected in April 2023 were qualified as estimated (UJ). The detected result for Parathion in OW-21A collected in April 2023 was qualified as estimated (J). Non-detect results for Parathion in MW-01B, MW-11A, MW-12A, T-10, MW-14, and OW-08A collected in April 2023 were qualified as estimated (UJ). The non-detect result for 4-Nitrophenol in MW-12A collected in April 2023 was qualified as estimated (UJ). The detected result for o, o, o-Triethyl phosphorothioate in MW-12A collected in April 2023 was qualified as estimated (J).

### 3.2.4 Analytical Methods Used for Sample Analysis

- **Evaluation:** Methods specified in the Sampling and Analysis Plan as listed on the chain-of-custody forms were employed to analyze the samples collected in April, June, August, and October 2023.
- **Findings:** No data have been qualified on the basis of incorrect analytical methods or reporting limits.

## **3.3 Accuracy**

### 3.3.1 Blanks

- **Evaluation:** No analytes were detected in field blank samples or laboratory method blank samples.
- **Findings:** No data have been qualified on the basis of detections of COCs in blank samples.

### 3.3.2 Sample Dilutions

- **Evaluation:** Certain samples required dilution to bring the sample concentration within the instrument calibration range or due to evidence of matrix interference. Samples that had elevated reporting limits (RLs) proportional to the dilution all had detections above these limits.
- **Findings:** No data have been qualified on the basis of dilutions since all sample results with elevated RLs had detections above these RLs.

### 3.3.3 Surrogate Recoveries

#### *3.3.3.1 Volatile Organic Compounds*

- **Evaluation:** Surrogate recoveries for VOC analyses for all samples met project specific DQOs.
- **Findings:** No data were qualified on the basis of surrogate recoveries for VOC analyses.

#### *3.3.3.2 Semi-Volatile Organic Compounds*

- **Evaluation:** Surrogate recoveries for Nitrobenzene-d5, Phenol-d5, and 2,4,6-Tribromophenol were less than project DQOs for sample MW-09A collected in April 2023.
- **Findings:** Non-detect results for 1,2-Dichlorobenzene, 1,4-Dichlorobenzene, 4-Nitrophenol, and o, o, o-Triethyl phosphorothioate in sample MW-09A collected in April 2023 and were qualified as estimated (UJ) in accordance with the NFG (USEPA, 2020b).

### 3.3.3.3 PCBs

- **Evaluation:** Surrogate recoveries of decachlorobiphenyl (DCB) were less than project DQOs, but greater than or equal to the lower expanded limit of 10%, for the analysis of polychlorinated biphenyls in samples MW-15F, OWR-15DF, Field Duplicate 1, OWR-13F, OW-21AF, OW-15F, OWR-11F, and PURGEWATER collected in April 2023, and for sample T-18 collected in June 2023. DCB recovered low (below the lab standard of 14% and below the expanded lower acceptance limit of 10%) for samples MW-20AF, OW-22F, OW-16AF collected in April 2023.
- **Findings:** For PCB analytes in samples MW-15F, OWR-15DF, Field Duplicate 1, OWR-13F, OW-21AF, OW-15F, OWR-11F, and Purgewater collected in April 2023, and T-18 collected in June 2023, detected results were qualified as estimated (J) and results reported as less than the reporting limit were qualified as estimated (UJ). A strict interpretation of the NFG (USEPA, 2020b) would reject the non-detect results of PCB Aroclors in MW-20AF, OW-22F, and OW-16AF collected in April 2023; however, these results were qualified as estimated (UJ) based on professional judgement. At MW-20A and OW-22, PCB Aroclors have never been detected in the filtered samples, consistent with the results of the April 2023 sampling event. Also, the unfiltered samples at both MW-20A and OW-22 were non-detect for all PCB Aroclors. The April 2023 results for OW-16AF are also in line with expected results as PCB Aroclors have only been detected once in the last 19 years in the filtered sample collected at OW-16A, and only when the unfiltered total PCBs were approximately 5 times greater than unfiltered reported total PCBs in OW-16A from April 2023.

### 3.3.3.4 Organochlorine Pesticides

- **Evaluation:** Surrogate recoveries of Triphenylphosphate (TPP) were less than the project DQOs for analysis of Parathion in sample OW-21A collected in April 2023 due to a dilution factor of 500.
- **Findings:** The detected result for Parathion in sample OW-21A was already qualified as estimated (J) based on a holding time exceedance as described above in section 3.2.3.

## 3.3.4 Laboratory Standards

### 3.3.4.1 Organochlorine Pesticides

- **Evaluation:** Internal standard (ISTD) recoveries exceeded control limits in sample OW-15 collected in April 2023 for the 8141B in one column. RPD between the confirmation column exceeded control limits in a surrogate of method 8081B/802A for sample MW-16F.
- **Findings:** Control limits were met in the second column for OW-15, so no data were qualified on the basis of Organochlorine Pesticides laboratory standards.

### 3.3.5 Laboratory Control Samples

#### 3.3.5.1 *Metals*

- **Evaluation:** An LCS for Cobalt in sample MW-01B collected in October 2023 was not prepared.
- **Findings:** Non-detect sample results of Cobalt in sample MW-01B collected October 2023 was qualified as estimated (UJ) in accordance with the *National Functional Guidelines for Inorganic Superfund Methods Data Review* (NFG; EPA, 2020a).

### 3.3.6 Matrix Spikes

#### 3.3.6.1 *PCBs*

- **Evaluation:** Recovery of PCB-1016 and PCB-1260 in the matrix spike and matrix spike duplicate (MS/MSD) samples collected at MW-20A in April 2023 exceeded the upper laboratory control limit. Recovery of PCB-1016 in the MSD sample collected at OW-10 in June 2023 exceeded the upper laboratory control limit.
- **Findings:** All associated sample results with elevated MS/MSD recovery for PCBs are non-detect and therefore do not require qualification per the NFG (USEPA, 2020b).

#### 3.3.6.2 *Metals*

- **Evaluation:** Recovery of Mercury in the MS/MSD samples collected at MW-20A was below project DQOs (80%).
- **Findings:** Non-detect mercury sample results in the associated MS/MSD samples (MW-20A and Field Duplicate 1 collected in April 2023) are qualified as estimated (UJ) in accordance with the NFG (USEPA, 2020a).

## 3.4 Precision

### 3.4.1 Field Duplicates

- **Evaluation:** Seven field duplicate pairs were analyzed and results having at least one detected analyte among the pair were included in the field precision comparison. Analyte pairs having an RPD of less than 35%, as specified in the SAP, were considered to be within control (see Table F.3). Duplicate samples met the project DQO for precision with three exceptions, two from the April 2023 event, one from the October 2023 event.

- i. The RPD for Manganese in OWR-14D and Field Duplicate 2 collected April 2023 was 40.0%.
- ii. The RPD for Pentachlorobiphenyl in OWR-14D and Field Duplicate 2 collected in April 2023 was not calculated since the analyte was detected only in Field Duplicate 2 and not in the original OWR-14D sample. However, the detection (0.2 µg/L) was at the reporting limit (0.2 µg/L).
- iii. The RPD for Chlorobenzene in MW-20A and Duplicate collected in October 2023 was not calculated since the analyte was detected only in the Duplicate and not in the original MW-20A sample. However, the detection (1.4 µg/L) was very close to the reporting limit (1 µg/L).

- **Findings:**

- i. For Manganese results in OWR-14D and Field Duplicate 2 collected in April 2023, detected results were qualified as estimated (J).
- ii. For Pentachlorobiphenyl results in OWR-14D and Field Duplicate 2 collected in April 2023, detected results were qualified as estimated (J) and non-detect results were qualified as estimated (UJ).
- iii. For Chlorobenzene results in MW-20A and Duplicate collected in April 2023, detected results were qualified as estimated (J) and non-detect results were qualified as estimated (UJ).

#### 3.4.2 Matrix Spike Duplicates

- **Evaluation:** All RPDs in the MS/MSD samples collected from MW-20A and OW-10 in April 2023 are within project DQOs.
- **Findings:** No data were qualified on the basis of MS/MSD RPDs.

## **4.0 SUMMARY AND ACHIEVEMENT OF DATA QUALITY OBJECTIVES**

The analytical data have been determined to be usable for the intended purpose of i) verifying groundwater conditions to evaluate whether a release to groundwater from WMA I has or has not occurred; ii) monitoring concentrations of constituents of concern (COCs) in groundwater; and iii) evaluating the effectiveness of corrective action efforts being implemented at WMA II, SWMU 1, the well OW-21A Corrective Action Area, and the OW-10 Corrective Action Area. Completeness was calculated as 100%, based on a total of 923 individual analytes of which no values were rejected. Therefore, the completeness criterion of 85% specified in the SAP was exceeded by a wide margin.

Notes:

- Samples analyzed by Eurofins Denver, Eurofins Savannah, and Eurofins Lancaster Laboratories Environment Testing
- DCB = Decachlorobiphenyl  
 LCS = Lab Control Sample  
 LCSD = Lab Control Sample Duplicate  
 MDL = Method Detection Limit  
 PCB = Polychlorinated Biphenyl
- Lab Qualifier Codes:  
 <U = Analyte was not detected at or above the reporting limit  
 H = Sample was prepped or analyzed beyond the specified holding time  
 J = Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.  
 \*+ = LCS and/or LCSD is outside acceptance limits, high biased.  
 \*- = LCS and/or LCSD is outside acceptance limits, low biased.  
 \*1 = LCS/LCSD RPD exceeds control limits.
- Validation Qualifier Codes:  
 J = Estimated, the analyte was detected and identified  
 UJ = Not detected, estimated  
 R = Rejected

19	Apr-21	18000	18000				
20	Apr-22	9800	9800				
21	Apr-23	7900	7900				
Coefficient of Variation:		0.50	0.44				
Mann-Kendall Statistic (S):		-29	-49				
Confidence Factor:		79.9%	94.0%				
Concentration Trend:		Stable	Prob. Decreasing				

- Notes:**
- At least four independent sampling events per well are required for calculating the trend. *Methodology is only valid for 4 to 40 samples.*
  - Confidence in Trend = Confidence (in percent) that constituent concentration is increasing (S>0) or decreasing (S<0).  
 ≥ 90% = Probably Increasing or Decreasing; >95% = Increasing or Decreasing.
  - Methodology based on "MAROS: A Decision Support System for Optimizing Monitoring Plans", J.J. Aziz, M. Ling, H.S. Rifai, C.J. Newell, and J.R. Gonzales, *Ground Water*, 41(3):355-367, 2003.
  - Non-detects are shown in blue (e.g., **0.0007**), and are quantified as one-half of the method detection limit for calculation of Mann-Kendall statistics.
  - For events with duplicate samples, the trend calculation is based on the original sample result. See Appendix E for duplicate sample results.
  - When more than 75% of the samples in a given well are non-detect results, a trend is not calculated to avoid calculating a trend on detection limits.

Coefficient of Variation:		3.09	0.49	2.50	3.96	0.32			
Mann-Kendall Statistic (S):		-86	-33	-59	21	2			
Confidence Factor:		88.6%	67.4%	79.4%	74.0%	51.0%			
Concentration Trend:		No Trend	Stable	No Trend	No Trend	No Trend			

**Notes:**

- At least four independent sampling events per well are required for calculating the trend. Methodology is only valid for 4 to 40 samples.
- Confidence in Trend = Confidence (in percent) that constituent concentration is increasing (S>0) or decreasing (S<0).  
 ≥ 90% = Probably Increasing or Decreasing; >95% = Increasing or Decreasing.
- Methodology based on "MAROS: A Decision Support System for Optimizing Monitoring Plans", J.J. Aziz, M. Ling, H.S. Rifai, C.J. Newell, and J.R. Gonzales, *Ground Water*, 41(3):355-367, 2003.
- Non-detects are shown in blue (e.g., 0.0007), and are quantified as one-half of the method detection limit for calculation of Mann-Kendall statistics.
- For events with duplicate samples, the trend calculation is based on the original sample result. See Appendix E for duplicate sample results.
- When more than 75% of the samples in a given well are non-detect results, a trend is not calculated to avoid calculating a trend on detection limits.

a) Was the COC properly completed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the COC signed by both field and laboratory personnel?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were samples received in good condition?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>The temperature of the cooler at receipt time was 6.1 °C, slightly above the National Functional Guidelines upper limit of 6.0 °C. Non-detects are qualified UJ.</u>

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Were hold times met for sample pretreatment?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>Parathion in sample T-10 was extracted outside of the 7-day holding time (8 days after sample collection). A strict interpretation of the NFG would indicate the non-detect result of parathion be rejected; however, the result was qualified as estimated (UJ) based on professional judgement and the following lines of evidence: 1. This sample result is in line with expected results as parathion has never been detected at T-10. 2. The hold time exceedance is minor.</u>
b) Were hold times met for sample analysis?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were the correct preservatives used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Was the correct method used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
e) Were appropriate reporting limits achieved?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Were any sample dilutions noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
g) Were any matrix problems noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>The sample was cloudy in appearance.</u>

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Blanks	YES	NO	NA	COMMENTS
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Laboratory Control Sample (LCS)	YES	NO	NA	COMMENTS
a) Was a LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Was the LCS accuracy criteria met?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>PCB-1260 recovered high (134%) above the upper laboratory limit of 130%. All associated sample results are non-detect; therefore, no qualification is required.</u>

Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were field dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were lab duplicates analyzed (note original and duplicate samples)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Multiple LCSDs</u>
d) Were lab dup. precision criteria met (note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>All LCS/ LCSD RPDs &lt;29%</u>

Blind Standards	YES	NO	NA	COMMENTS
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Matrix Spike/Matrix Spike Duplicate (MS/MSD)	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
b) Was MSD accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were MS/MSD precision criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Surrogate Spikes	YES	NO	NA	COMMENTS
a) Were surrogate recoveries within control limits?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>Phenol-d5 recovered low (12%) below the lower laboratory limit of 27%. However, this surrogate is not associated with the target analyte 4-Nitrophenol; therefore, no qualification is required.</u>
b) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

# Eurofins Savannah

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

# Definitions/Glossary

Client: GSI Environmental, Inc  
Project/Site: Anniston CERCLA April 2023

Job ID: 680-233552-1

## Qualifiers

### GC/MS Semi VOA

Qualifier	Qualifier Description
S1-	Surrogate recovery exceeds control limits, low biased.

### GC Semi VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

Client: GSI Environmental, Inc  
Project/Site: Anniston CERCLA April 2023

Job ID: 680-233552-1

---

**Job ID: 680-233552-1**

---

**Laboratory: Eurofins Savannah**

---

**Narrative**

**Job Narrative  
680-233552-1**

**Receipt**

The sample was received on 4/13/2023 10:30 AM. Unless otherwise noted below, the sample arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 6.1°C

**GC/MS Semi VOA**

Method 8270D: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: T-10 (680-233552-1). These results have been reported and qualified.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**GC Semi VOA**

Method 8141B: The following sample was analyzed outside of holding time due to a scheduling error: T-10 (680-233552-1).

Method 8141B: The following sample T-10 (680-233552-1) was cloudy in appearance.

Method 8141B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-609225 method: 8141.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**Pesticides/PCBs**

Method 8081B\_8082A: The laboratory control sample duplicate (LCSD) for preparation batch 680-777035 and analytical batch 680-777391 recovered outside control limits for the following analyte: PCB-1260. This analyte was biased high in the LCSD and was not detected in the associated samples; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

## Login Sample Receipt Checklist

Client: GSI Environmental, Inc

Job Number: 680-233552-1

**Login Number: 233552**

**List Source: Eurofins Savannah**

**List Number: 1**

**Creator: Johnson, Corey M**

Question	Answer	Comment
Radioactivity wasn't checked or is <=/ background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Company Name: GSI Environmental, Inc.  
 Project Name: RCRA Groundwater Monitoring  
 Reviewer: Jessica Alanis

Project Manager: Noel Savoie  
 Project Number: 680-233553-1  
 Validation Date: 08/15/2023

Laboratory: Eurofins Savannah and Denver Laboratories SDG #: 680-233553-1  
 Analytical Method (type and no.): VOCs (8260B), SVOCS (8270D), PCBs (8081A/8082B), Pesticides (8141B)  
 Matrix:  Air  Soil/Sed.  Water  Waste   
 Sample Names: MW-01B, MW-11A, MW-12A, Trip blank 20230411

**NOTE: Please provide calculation in Comment areas or on the back (if on the back please indicate in comment areas).**

Field Information	YES	NO	NA	COMMENTS
a) Sampling dates noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Sampling team indicated?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Sample location noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
d) Sample depth indicated (Soils)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
e) Sample type indicated (grab/composite)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
f) Field QC noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Trip blank 20230411</u>
g) Field parameters collected (note types)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Temp., pH, sp. cond., DO, ORP, turbidity</u>
h) Field Calibration within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
i) Notations of unacceptable field conditions/performances from field logs or field notes?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
j) Does the laboratory narrative indicate deficiencies?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

Note Deficiencies: 4-Nitrophenol (Method 8270D) was identified to be a poor and/ or erratic performer, detections for this analyte are considered estimated; however, all results for this analyte were not detected; therefore, no qualification is required on this basis.

Chain-of-Custody (COC)	YES	NO	NA	COMMENTS
a) Was the COC properly completed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Was the COC signed by both field and laboratory personnel?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Were samples received in good condition?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Were hold times met for sample pretreatment?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>Method 8141B in MW-01B, MW-11A, and MW-12A was extracted outside of the 7-day holding time (8 days after sample collection). A strict interpretation of the NFG would indicate the non-detect results of parathion and tetraethyldithiopyrophosphate be rejected; however, the results were qualified as estimated (UJ) based on professional judgement and the following lines of evidence: 1. These sample results are in line with expected results, as neither of these constituents have been detected at any of these wells in the previous ten years. 2. The hold time exceedance is minor. Method 8270 in MW-12A was extracted outside of the 7-day holding time (22 days after sample collection). A strict interpretation of the NFG would reject the non-detect result of 4-nitrophenol; however, the result was qualified as estimated (UJ) based on professional judgement using the following lines of evidence: 1. o,o,o-Triethylphosphorothioate, also analyzed by method 8270 in this sample, was detected at a similar concentration to recent results (e.g., April 2022 result = 21</u>

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

ug/L. April 2023 result = 23 ug/L). 2. This sample result is in line with expected results as 4-Nitrophenol has never been detected at MW-12A.

## QA LEVEL II - INORGANIC DATA EVALUATION CHECKLIST

Company Name: GSI Environmental, Inc.  
 Project Name: RCRA Groundwater Monitoring  
 Reviewer: Jessica Alanis

Project Manager: Noel Savoie  
 Project Number: 680-233553-1  
 Validation Date: 08/15/2023

Laboratory: Eurofins TestAmerica Savannah      SDG #: 680-233553-1  
 Analytical Method (type and no.): Metals (6010D), Mercury (7470A)  
 Matrix:  Air    Soil/Sed.    Water    Waste    \_\_\_\_\_  
 Sample Names: MW-01B

**NOTE: Please provide calculation in Comment areas or on the back (if on the back please indicate in comment areas).**

Field Information	YES	NO	NA	COMMENTS
a) Sampling dates noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Sampling team indicated?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Sample location noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Sample depth indicated (Soils)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
e) Sample type indicated (grab/composite)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Field QC noted?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
g) Field parameters collected (note types)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Temp., pH, sp. cond., DO, ORP, turbidity</u>
h) Field Calibration within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
i) Notations of unacceptable field conditions/performances from field logs or field notes?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
j) Does the laboratory narrative indicate deficiencies?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
Note Deficiencies: _____				

Chain-of-Custody (COC)	YES	NO	NA	COMMENTS
a) Was the COC properly completed?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>The analysis requested on the COC was inadvertently marked as dissolved Cobalt and Mercury; however, the correct analysis for total Cobalt and Mercury was performed by the laboratory.</u>
b) Was the COC signed by both field and laboratory personnel?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were samples received in good condition?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Were hold times met for sample pretreatment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were hold times met for sample analysis?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were the correct preservatives used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Was the correct method used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
e) Were appropriate reporting limits achieved?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Were any sample dilutions noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
g) Were any matrix problems noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

## QA LEVEL II - INORGANIC DATA EVALUATION CHECKLIST

Blanks	YES	NO	NA	COMMENTS
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Laboratory Control Sample (LCS)	YES	NO	NA	COMMENTS
a) Was a LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Was the LCS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were field dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were lab duplicates analyzed (note original and duplicate samples)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
d) Were lab dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Blind Standards	YES	NO	NA	COMMENTS
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Matrix Spike/Matrix Spike Duplicate (MS/MSD)	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
b) Was MSD accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were MS/MSD precision criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Ben Smith  
GSI Environmental, Inc  
2211 Norfolk, Suite 1000  
Houston, Texas 77098-4044

Generated 5/10/2023 5:22:21 PM

## JOB DESCRIPTION

Anniston RCRA April 2023

## JOB NUMBER

680-233553-1

# Eurofins Savannah

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

## Authorization

## Qualifiers

### GC/MS Semi VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.

### GC Semi VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

Client: GSI Environmental, Inc  
Project/Site: Anniston RCRA April 2023

Job ID: 680-233553-1

## Job ID: 680-233553-1

---

### Laboratory: Eurofins Savannah

#### Narrative

---

#### Job Narrative 680-233553-1

#### Receipt

The samples were received on 4/13/2023 10:30 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 3 coolers at receipt time were 1.1°C, 1.3°C and 4.3°C

#### Receipt Exceptions

The cooler containing the containers for MW-12A not received on 4/13/2023. The cooler arrived on 4/14/2023.

#### GC/MS VOA

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC/MS Semi VOA

Method 8270D: The following analyte has been identified, in the reference method and/or via historical data, to be poor and/or erratic performers: 4-Nitrophenol. This analyte may have a %D >20% but must be <50%. If >50%, a CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

Method 8270D: The following sample were analyzed outside of holding time due to a scheduling error: MW-12A (680-233553-3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC Semi VOA

Method 8141B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-609225 method.

Method 8141B: The following samples were analyzed outside of holding time due to a scheduling error: MW-01B (680-233553-1), MW-11A (680-233553-2) and MW-12A (680-233553-3).

Method 8141B: The following sample MW-01B (680-233553-1) was cloudy in appearance.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Pesticides/PCBs

Method 8081B\_8082A: The laboratory control sample duplicate (LCSD) for preparation batch 680-777035 and analytical batch 680-777391 recovered outside control limits for the following analyte: PCB-1260. This analyte was biased high in the LCSD and was not detected in the associated samples; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

## Login Sample Receipt Checklist

Client: GSI Environmental, Inc

Job Number: 680-233553-1

**Login Number: 233553**

**List Number: 1**

**Creator: Johnson, Corey M**

**List Source: Eurofins Savannah**

Question	Answer	Comment
Radioactivity wasn't checked or is <=/ background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	False	Refer to Job Narrative for details.
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

g) Field parameters collected (note types)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Temp., pH, sp. cond., DO, ORP, turbidity</u>
h) Field Calibration within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
i) Notations of unacceptable field conditions/performances from field logs or field notes?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
j) Does the laboratory narrative indicate deficiencies?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

Note Deficiencies: Several MS/MSD deficiencies noted in the laboratory narrative; however, project specific MS/MSD samples were not submitted with this lab report; therefore, no results are qualified on this basis. The RPD between the primary and confirmation column exceeded control limits in a surrogate of Method 8081B/8082A for sample MW-16F; however, all recoveries were within acceptance limits, so no qualification is required.

Chain-of-Custody (COC)	YES	NO	NA	COMMENTS
a) Was the COC properly completed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Was the COC signed by both field and laboratory personnel?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Were samples received in good condition?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Were hold times met for sample pretreatment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Were hold times met for sample analysis?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Were the correct preservatives used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
d) Was the correct method used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
e) Were appropriate reporting limits achieved?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
f) Were any sample dilutions noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
g) Were any matrix problems noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Sample MW-16 was yellow in color.</u>

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Blanks	YES	NO	NA	COMMENTS
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

Laboratory Control Sample (LCS)	YES	NO	NA	COMMENTS
a) Was a LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Was the LCS accuracy criteria met?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>PCB-1260 recovered high (134%) above the upper laboratory limit of 130%. All associated sample results are non-detect; therefore, no qualification is required.</u>

Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were field dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were lab duplicates analyzed (note original and duplicate samples)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Multiple LCSDs.</u>
d) Were lab dup. precision criteria met (note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>All LCS/ LCSDs RPD &lt; 29%</u>

Blind Standards	YES	NO	NA	COMMENTS
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Matrix Spike/Matrix Spike Duplicate (MS/MSD)	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
b) Was MSD accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were MS/MSD precision criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Surrogate Spikes	YES	NO	NA	COMMENTS
a) Were surrogate recoveries within control limits?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>Phenol-d5 recovered low (18%) below the lower laboratory limit of 27% for sample MW-15, method 8270D; however, phenol-d5 is not associated with the target analytes; therefore, no qualification is required. DCB recovered low (13%) below the lower laboratory limit of 14% for sample MW-15F, method 8081B/ 8082A. Since DCB recovery was greater than the expanded lower acceptance limit of 10% (NFG, 2020), all associated analytes are qualified as estimated (UJ). TCX recovered low (35%) below the lower laboratory limit of 40% for sample MW-16, method 8081B/8082A. However, this surrogate is not associated with the target analytes; therefore, no qualification is required. Phenol-d5 recovered low (0.9%) below the lower laboratory limit of 27% for sample MW-13A-R, method 8270D. However, this surrogate is not associated with the target analytes (4-Nitrophenol and O.O.O-TEPP); therefore, no qualification is required.</u>
b) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Comments/Notes:

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Ben Smith  
GSI Environmental, Inc  
2211 Norfolk, Suite 1000  
Houston, Texas 77098-4044

Generated 5/9/2023 5:56:43 PM

## JOB DESCRIPTION

Anniston RCRA 2023

## JOB NUMBER

680-233598-1

# Eurofins Savannah

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

## Authorization

## Qualifiers

### GC/MS Semi VOA

Qualifier	Qualifier Description
S1-	Surrogate recovery exceeds control limits, low biased.

### GC Semi VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
S1-	Surrogate recovery exceeds control limits, low biased.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

Client: GSI Environmental, Inc  
Project/Site: Anniston RCRA 2023

Job ID: 680-233598-1

**Job ID: 680-233598-1**

**Laboratory: Eurofins Savannah**

## Narrative

### Job Narrative 680-233598-1

#### Receipt

The samples were received on 4/14/2023 10:30 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 5.0°C and 5.2°C

#### GC/MS VOA

Method 8260D: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batches 680-774831 and 680-775160.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC/MS Semi VOA

Method 8270D: Surrogate recovery was outside acceptance limits for the following matrix spike(MS) sample: (680-233554-A-2-B MS). The parent sample's surrogate recovery was within limits. The MS sample has been qualified and reported.

Method 8270D: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 680-774312 and analytical batch 680-777012 were outside control limits for one or more analytes. See QC Sample Results for detail. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery is within acceptance limits.

Method 8270D: The following sample recovered outside the control limits for this surrogate: Phenol-d5. The analyte required for this sample is not associated with this surrogate, therefore the data has been qualified and reported. MW-13A-R (680-233598-1)

Method 8270D: Six surrogates are used for this analysis. The laboratory's SOP allows one acid and one base of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: MW-15 (680-233598-3). These results have been reported and qualified.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC Semi VOA

Method 8141B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-609225 method: 8141.

Method 8141B: The following sample MW-16 (680-233598-5) was yellow in color.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Pesticides/PCBs

Method 8081B\_8082A: Two surrogates are used for this analysis. The laboratory's SOP allows one of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following samples contained an allowable number of surrogate compounds outside limits: MW-15F (680-233598-4) and MW-16 (680-233598-5). These results have been reported and qualified.

Method 8081B\_8082A: The laboratory control sample duplicate (LCSD) for preparation batch 680-777035 and analytical batch 680-777391 recovered outside control limits for the following analyte: PCB-1260. This analyte was biased high in the LCSD and was not detected in the associated samples; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

# Sample Summary

Note: Since laboratory accreditations are subject to change, Eurofins Environment Testing Southeast, LLC places the ownership of method, analyte & accreditation compliance upon our subcontract laboratories. This sample shipment is forwarded under chain-of-custody. If the laboratory does not currently maintain accreditation in the State of Origin listed above for analysis/test/matrix being analyzed, the samples must be shipped back to the Eurofins Environment Testing Southeast, LLC laboratory or other instructions will be provided. Any changes to accreditation status should be brought to Eurofins Environment Testing Southeast, LLC attention immediately. If all requested accreditations are current to date, return the signed Chain of Custody attesting to said compliance to Eurofins Environment Testing Southeast, LLC.

**Possible Hazard Identification**

## Login Sample Receipt Checklist

Client: GSI Environmental, Inc

Job Number: 680-233598-1

**Login Number: 233598**

**List Number: 1**

**Creator: Padayao, Abigail**

**List Source: Eurofins Savannah**

Question	Answer	Comment
Radioactivity wasn't checked or is <math>\leq</math> background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	False	COC not relinquished.
Is the Field Sampler's name present on COC?	N/A	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Company Name: GSI Environmental, Inc.  
 Project Name: CERCLA Groundwater Monitoring  
 Reviewer: Jessica Alanis

Project Manager: Noel Savoie  
 Project Number: 680-233638-1  
 Validation Date: 08/16/2023

Laboratory: Eurofins Savannah SDG #: 680-233638-1  
 Analytical Method (type and no.): PCBs (8081A/8082B)  
 Matrix:  Air  Soil/Sed.  Water  Waste   
 Sample Names: T-06, T-06F, OWR-15D, OWR-15DF

**NOTE: Please provide calculation in Comment areas or on the back (if on the back please indicate in comment areas).**

Field Information	YES	NO	NA	COMMENTS
a) Sampling dates noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Sampling team indicated?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Sample location noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Sample depth indicated (Soils)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
e) Sample type indicated (grab/composite)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Field QC noted?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
g) Field parameters collected (note types)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Temp., pH, sp. cond., DO, ORP, turbidity</u>
h) Field Calibration within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
i) Notations of unacceptable field conditions/performances from field logs or field notes?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
j) Does the laboratory narrative indicate deficiencies?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

Note Deficiencies: Sample OWR-15D, analysis of method 8081B/ 8082A was re-performed by the laboratory due to a failure of quality control parameters in the initial analysis, causing hold time issues. See below. The RPD between the primary and confirmation column exceeded control limits in a surrogate of Method 8081B/8082A for sample OWR-15D and OWR-15DF; however, all recoveries were within acceptance limits, so no qualification is required.

Chain-of-Custody (COC)	YES	NO	NA	COMMENTS
a) Was the COC properly completed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the COC signed by both field and laboratory personnel?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were samples received in good condition?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Were hold times met for sample pretreatment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were hold times met for sample analysis?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>PCB-1221 in sample OWR-15D was re-analyzed due to a lab failure of quality control parameters in the initial analysis, causing analyses to occur outside analytical holding time. The detection is qualified as estimated (J).</u>
c) Were the correct preservatives used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Was the correct method used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
e) Were appropriate reporting limits achieved?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Were any sample dilutions noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>PCB-1221 in sample OWR-15D had a dilution factor of 5.</u>
g) Were any matrix problems noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
<b>Blanks</b>	<b>YES</b>	<b>NO</b>	<b>NA</b>	<b>COMMENTS</b>
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
<b>Laboratory Control Sample (LCS)</b>	<b>YES</b>	<b>NO</b>	<b>NA</b>	<b>COMMENTS</b>
a) Was a LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Was the LCS accuracy criteria met?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>PCB-1260 recovered high (134%) above the upper laboratory limit of 130%. All associated sample results are non-detect; therefore, no qualification is required.</u>
<b>Duplicates</b>	<b>YES</b>	<b>NO</b>	<b>NA</b>	<b>COMMENTS</b>
a) Were field duplicates collected (note original and duplicate sample names)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were field dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were lab duplicates analyzed (note original and duplicate samples)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Multiple LCSDs</u>
d) Were lab dup. precision criteria met (note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>All LCS/ LCSD RPDs &lt;29%</u>
<b>Blind Standards</b>	<b>YES</b>	<b>NO</b>	<b>NA</b>	<b>COMMENTS</b>
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Matrix Spike/Matrix Spike Duplicate (MS/MSD)	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
b) Was MSD accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were MS/MSD precision criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Surrogate Spikes	YES	NO	NA	COMMENTS
a) Were surrogate recoveries within control limits?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>TCX recovered low (36%) below the lower laboratory limit of 40% in sample OWR-15D. However, this surrogate is not associated with the target analytes; therefore, no qualification is required. DCB recovered low (12%) below the lower laboratory limit of 14% in sample OWR-15DF, but above the expanded lower acceptance limit (10%) specified in the National Functional Guidelines for Organic Superfund Methods (NFG, 2020). Associated results are qualified as estimated (UJ).</u>
b) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	

**Comments/Notes:**

\_\_\_\_\_

**Data Qualification:**

Sample Name	Constituent(s)	Result	Qualifier	Reason
OWR-15D	PCB-1221	43 ug/L	J	Analyzed outside holding time
OWR-15DF	PCB-1016	<0.5 ug/L	UJ	Low DCB surrogate recovery
OWR-15DF	PCB-1221	<0.5 ug/L	UJ	Low DCB surrogate recovery
OWR-15DF	PCB-1232	<0.5 ug/L	UJ	Low DCB surrogate recovery
OWR-15DF	PCB-1242	<0.5 ug/L	UJ	Low DCB surrogate recovery
OWR-15DF	PCB-1248	<0.5 ug/L	UJ	Low DCB surrogate recovery
OWR-15DF	PCB-1254	<0.5 ug/L	UJ	Low DCB surrogate recovery
OWR-15DF	PCB-1260	<0.5 ug/L	UJ	Low DCB surrogate recovery
OWR-15DF	PCB-1268	<0.5 ug/L	UJ	Low DCB surrogate recovery

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

# Definitions/Glossary

Client: GSI Environmental, Inc  
Project/Site: Anniston CERCLA April 2023

Job ID: 680-233638-1

## Qualifiers

### GC Semi VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
S1-	Surrogate recovery exceeds control limits, low biased.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

Client: GSI Environmental, Inc  
Project/Site: Anniston CERCLA April 2023

Job ID: 680-233638-1

---

## Job ID: 680-233638-1

---

### Laboratory: Eurofins Savannah

#### Narrative

---

#### Job Narrative 680-233638-1

#### Revision

The report being provided is a revision of the original report sent on 5/9/2023. The report (revision 1) is being revised due to the client requested review of the PCB Aroclor data.

#### Receipt

The samples were received on 4/15/2023 8:45 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 4.1°C

#### Pesticides/PCBs

Method 8081B\_8082A: Two surrogates are used for this analysis. The laboratory's SOP allows one of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following samples contained an allowable number of surrogate compounds outside limits: OWR-15D (680-233638-2) and OWR-15DF (680-233638-3). These results have been reported and qualified.

Method 8081B\_8082A: The laboratory control sample duplicate (LCSD) for preparation batch 680-777035 and analytical batch 680-777391 recovered outside control limits for the following analyte: PCB-1260. This analyte was biased high in the LCSD and was not detected in the associated samples; therefore, the data have been reported.

Method 8081B/8082A: Reanalysis of the following sample was performed outside of the analytical holding time due to failure of quality control parameters in the initial analysis. OWR-15D (680-233638-2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

**Creator: Johnson, Corey M**

**List Source: Eurofins Savannah**

Question	Answer	Comment
Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Company Name: GSI Environmental, Inc.  
 Project Name: RCRA Groundwater Monitoring  
 Reviewer: Jessica Alanis

Project Manager: Noel Savoie  
 Project Number: 680-233641-1  
 Validation Date: 08/16/2023

Laboratory: Eurofins Savannah and Denver Laboratories SDG #: 680-233641-1  
 Analytical Method (type and no.): PCBs (8081B/8081A), VOCs (8260B), SVOCs (8270D), SVOCs (8270D SIM), Pesticides (8141B)  
 Matrix:  Air  Soil/Sed.  Water  Waste  \_\_\_\_\_  
 Sample Names: MW-08, MW-09A, MW-20A, MW-20AF, OW-22, OW-22F, Field Duplicate 1, Trip Blank 20230413

**NOTE: Please provide calculation in Comment areas or on the back (if on the back please indicate in comment areas).**

Field Information	YES	NO	NA	COMMENTS
a) Sampling dates noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Sampling team indicated?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Sample location noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Sample depth indicated (Soils)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

c) Were MS/MSD precision criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>All MS/MSD RPDs ≤ 17%</u> _____
Surrogate Spikes	YES	NO	NA	COMMENTS
a) Were surrogate recoveries within control limits?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>Nitrobenzene-d5, Phenol-d5, and 2,4,6-Tribromophenol recovered low (30%, 15%, 37%, respectively) below the lower laboratory limits of 32%, 27%, and 39%, respectively of method 8270D in sample MW-09A, but above the expanded lower acceptance limit (10%) specified in the NFG, 2020. Associated results are qualified as estimated (UJ). TCX recovered low (39% and 36%) below the lower laboratory control limit of 40% of method 8081B/8082A in sample MW-09A and Field Duplicate 1, respectively. However, this surrogate is not associated with the target analytes; therefore, no qualification is required. DCB recovered low (13%) below the lower laboratory control limit of 14% of method 8081B/8082A in Field Duplicate 1. Associated results are qualified UJ because recovery was above the expanded lower acceptance limit of 10% specified in NFG, 2020. Decachlorobiphenyl (DCB) recovered low (below the lab standard of 14% and below the expanded lower acceptance limit of 10%) for sample MW-20AF (9%) for Aroclor analysis by 8081B/8082A. A strict interpretation of the NFG would reject these non-detect results of PCB</u> _____

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Aroclors; however, the results were qualified as estimated (UJ) based on professional judgement and the following lines of evidence: 1. These sample results are in line with expected results as PCB Aroclors have never been detected in the filtered sample collected at MW-20A. 2. The unfiltered sample collected at MW-20A during this sampling event was also non-detect for all PCB Aroclors. Decachlorobiphenyl (DCB) recovered low (below the lab standard of 14% and below the expanded lower acceptance limit of 10%) for sample OW-22F (9%) for Aroclor analysis by 8081B/8082A. A strict interpretation of the NFG would reject these non-detect results of PCB Aroclors; however, the results were qualified as estimated (UJ) based on professional judgement and the following lines of evidence: 1. These sample results are in line with expected results, all PCB aroclors have never been detected in the filtered sample collected at OW-22. 2. The unfiltered sample collected at OW-22 during this sampling event was also non-detect for all PCB Aroclors.

b) Were surrogate recoveries not calculated due to dilutions?    \_\_\_\_\_

**Comments/Notes:**

---

**Data Qualification:**

Sample Name	Constituent(s)	Result	Qualifier	Reason
OW-22	Chlorobenzene	<1.0 ug/L	UJ	Analyzed outside holding time
MW-09A	1,2-Dichlorobenzene	<10 ug/L	UJ	Surrogates Nitrobenzene-d5, Phenol-d5, and 2,4,6-Tribromophenol recovered low.
MW-09A	1,4-Dichlorobenzene	<10 ug/L	UJ	Surrogates Nitrobenzene-d5, Phenol-d5, and 2,4,6-Tribromophenol recovered low.
MW-09A	4-Nitrophenol	<25 ug/L	UJ	Surrogates Nitrobenzene-d5, Phenol-d5, and 2,4,6-Tribromophenol recovered low.
MW-09A	o,o,o-Triethylphosphorothioate	<10 ug/L	UJ	Surrogates Nitrobenzene-d5, Phenol-d5, and 2,4,6-Tribromophenol recovered low.
MW-20AF	PCB-1016	<0.5 ug/L	UJ	Low DCB surrogate recovery below expanded lower acceptance limits

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

## Qualifiers

### GC/MS Semi VOA

Qualifier	Qualifier Description
S1-	Surrogate recovery exceeds control limits, low biased.

### GC Semi VOA

Qualifier	Qualifier Description
E	Result exceeded calibration range.
F1	MS and/or MSD recovery exceeds control limits.
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
S1-	Surrogate recovery exceeds control limits, low biased.

### Metals

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

**Job ID: 680-233641-1**

**Laboratory: Eurofins Savannah**

## Narrative

### Job Narrative 680-233641-1

#### Receipt

The samples were received on 4/15/2023 8:45 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 6 coolers at receipt time were 1.1°C, 1.6°C, 1.9°C, 2.8°C, 4.9°C and 5.9°C

#### GC/MS VOA

Method 8260D: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batches 680-775141 and 680-780338.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC/MS Semi VOA

Method 8270D: Surrogate recovery for the following sample was outside acceptance limits: MW-09A (680-233641-2). The results have been reported since three surrogates pass.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC Semi VOA

No analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Pesticides/PCBs

Method 8081B\_8082A: Two surrogates are used for this analysis. The laboratory's SOP allows one of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: MW-09A (680-233641-2). These results have been reported and qualified.

Method 8081B\_8082A: Surrogate recovery for the following sample was outside of acceptance limits: Field Duplicate 1 (680-233641-5). There was insufficient sample to perform a re-extraction; therefore, the data has been qualified and reported. The second bottle was inadvertently broken in lab.

Method 8081B\_8082A: Surrogate recovery for the following samples were outside control limits: MW-20AF (680-233641-4) and OW-22F (680-233641-7). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

Method 8081B\_8082A: The matrix spike/matrix spike duplicate (MS/MSD) associated with prep batch 680-777299 and analytical batch 680-777396 recovered outside advisory control limits for PCB-1016 and PCB-1260. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) met acceptance criteria; therefore, the results have been reported and qualified.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Metals

Method 7470A: The matrix spike/matrix spike duplicate (MS/MSD) associated with prep batch 680-773851 and analytical batch 680-774093 recovered outside advisory control limits for Mercury. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) met acceptance criteria; therefore, the results have been reported and qualified.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Note: Since laboratory accreditations are subject to change, Eurofins Environment Testing Southeast, LLC places the ownership of method, analyte & accreditation compliance upon our subcontract laboratories. This sample shipment is forwarded under chain-of-custody. If this laboratory does not currently maintain accreditation in the State of Origin listed above for analysis/matrix being analyzed, the samples must be shipped back to the Eurofins Environment Testing Southeast, LLC laboratory or other instructions will be provided. Any changes to accreditation status should be brought to Eurofins Environment Testing Southeast, LLC attention immediately. If all requested accreditations are current to date, return the signed Chain of Custody attesting to said compliance to Eurofins Environment Testing Southeast, LLC.

# Login Sample Receipt Checklist

Client: GSI Environmental, Inc

Job Number: 680-233641-1

**Login Number: 233641**

**List Source: Eurofins Savannah**

**List Number: 1**

**Creator: Johnson, Corey M**

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Blanks	YES	NO	NA	COMMENTS
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Laboratory Control Sample (LCS)	YES	NO	NA	COMMENTS
a) Was a LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Was the LCS accuracy criteria met?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>PCB-1260 recovered high (134%) above the upper laboratory limit of 130%. All associated sample results are non-detect; therefore, no qualification is required.</u>

Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were field dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were lab duplicates analyzed (note original and duplicate samples)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Multiple LCSDs</u>
d) Were lab dup. precision criteria met (note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>All LCS/LCSD RPDs &lt;29%</u>

Blind Standards	YES	NO	NA	COMMENTS
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Matrix Spike/Matrix Spike Duplicate (MS/MSD)	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
b) Was MSD accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were MS/MSD precision criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Surrogate Spikes	YES	NO	NA	COMMENTS
a) Were surrogate recoveries within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

**Comments/Notes:**

No data requires qualification.

Anniston CERCLA April 2023

**JOB NUMBER**

680-233645-1

# Eurofins Savannah

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

# Definitions/Glossary

Client: GSI Environmental, Inc  
Project/Site: Anniston CERCLA April 2023

Job ID: 680-233645-1

## Qualifiers

### GC Semi VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

Client: GSI Environmental, Inc  
Project/Site: Anniston CERCLA April 2023

Job ID: 680-233645-1

---

**Job ID: 680-233645-1**

---

**Laboratory: Eurofins Savannah**

---

**Narrative**

**Job Narrative  
680-233645-1**

**Receipt**

The samples were received on 4/14/2023 10:30 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 3.5°C

**Pesticides/PCBs**

Method 8081B\_8082A: The laboratory control sample duplicate (LCSD) for preparation batch 680-777035 and analytical batch 680-777391 recovered outside control limits for the following analytes: PCB-1260. These analytes were biased high in the LCSD and were not detected in the associated samples; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**Metals**

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**List Number: 1**

**Creator: Drake, Victoria**

**List Source: Eurofins Savannah**

Question	Answer	Comment
Radioactivity wasn't checked or is <=/ background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Company Name: GSI Environmental, Inc.  
 Project Name: CERCLA Groundwater Monitoring  
 Reviewer: Jessica Alanis

Project Manager: Noel Savoie  
 Project Number: 680-233701-1  
 Validation Date: 08/30/2023

Laboratory: Eurofins Savannah and Lancaster Laboratories      SDG #: 680-233701-1  
 Analytical Method (type and no.): PCBs (8081B/8081A), VOCs (8260B), PCB Homologs (680)  
 Matrix:  Air     Soil/Sed.     Water     Waste     \_\_\_\_\_  
 Sample Names: OW-10, OWR-13, OWR-13F, OWR-14D, OWR-14DF, T-18, T-18F, Field Duplicate 2, Field Duplicate 2F, Field Duplicate 3, Trip Blank 20230417

**NOTE: Please provide calculation in Comment areas or on the back (if on the back please indicate in comment areas).**

Field Information	YES	NO	NA	COMMENTS
a) Sampling dates noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Sampling team indicated?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Sample location noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Sample depth indicated (Soils)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
e) Sample type indicated (grab/composite)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Field QC noted? (original sample/ duplicate sample): OWR-14D/Field Duplicate 2; OWR-14DF/Field Duplicate 2F; OW-10/Field Duplicate 3.	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Trip Blank 20230417 &amp; three duplicate pairs</u>
g) Field parameters collected (note types)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Temp., pH, sp. cond., DO, ORP, turbidity</u>
h) Field Calibration within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
i) Notations of unacceptable field conditions/performances from field logs or field notes?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
j) Does the laboratory narrative indicate deficiencies?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

Note Deficiencies: Due to an error in sample placement by the laboratory, several samples set to be analyzed for PCBs by Method 8081B/8082A were disposed of before extraction. The samples included: OW-10, OW-10F, Field Duplicate 3, Field Duplicate 3F, WEL-01, WEL-01F, T-04, T-04F, T-18, T-18F, T-20, and T-20F. A resampling event took place to collect samples from these locations for PCB analysis by Method 8081B/8082A – these results can be found in Laboratory Report 680-236362-1.

Chain-of-Custody (COC)	YES	NO	NA	COMMENTS
a) Was the COC properly completed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the COC signed by both field and laboratory personnel?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were samples received in good condition?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>One 1-L bottle was received broken for sample T-18F; however, sufficient sample in remaining containers was available for analysis.</u>

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Were hold times met for sample pretreatment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were hold times met for sample analysis?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were the correct preservatives used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Was the correct method used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
e) Were appropriate reporting limits achieved?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>Total Dichlorobiphenyls and Total Monochlorobiphenyls RLs in sample T-18 are elevated (0.2 ug/L) above the designated 0.1 ug/L RL. Sample results are above these elevated RLs; therefore, no data is qualified on this basis.</u>
f) Were any sample dilutions noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>Total Dichlorobiphenyls and Total Monochlorobiphenyls in sample T-18, DF = 10.</u>
g) Were any matrix problems noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

Blanks	YES	NO	NA	COMMENTS
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

Laboratory Control Sample (LCS)	YES	NO	NA	COMMENTS
a) Was a LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Was the LCS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>The LCSD recovery of prep batch 374605 and analysis batch 3755831 was not calculated in the laboratory report. Calculations were conducted as part of this data validation and found to be within limits.</u>

Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Three duplicate pairs (original sample/ duplicate sample): OWR-14D/Field Duplicate 2; OWR-14DF/Field Duplicate 2F; OW-10/Field Duplicate 3.</u>
b) Were field dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>Total Tetrachlorobiphenyls: OWR-14D (0.38 ug/L)/ Field Duplicate 2 (0.42 ug/L) RPD= 10%. Total Pentachlorobiphenyls: OWR-14D (&lt;0.2 ug/L)/ Field Duplicate 2 (0.2 ug/L) RPD cannot be calculated due to a detection and non-detection; results are qualified as estimated (UJ / J). Trichloroethene: OW-10 (3.3 ug/L)/ Field Duplicate 3 (3.2 ug/L) RPD = 3%.</u>
c) Were lab duplicates analyzed (note original and duplicate samples)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Multiple LCS/LCSD pairs</u> _____
d) Were lab dup. precision criteria met (note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>The LCSD recovery of prep batch 374605 and analysis batch 3755831 was not calculated in the lab report. Calculations, including RPD calculations with the corresponding LCS, were conducted as part of this data validation and found to be within limits. All LCS/ LCSD RPDs ≤7%.</u>

Blind Standards	YES	NO	NA	COMMENTS
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Matrix Spike/Matrix Spike Duplicate (MS/MSD)	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Note that the laboratory only analyzed site-specific MS/MSD samples for VOCs by method 8260D due to the sample misplacement by the laboratory for PCB Aroclors by method 8081B/8082A (see data validation on laboratory report 680-236362-1). MS/MSD samples are not submitted for PCB Homologs by Method 680 in this laboratory report.</u>
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was MSD accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>See note above.</u>
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
c) Were MS/MSD precision criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>MS/MSD RPD = 1%</u>

Surrogate Spikes	YES	NO	NA	COMMENTS
a) Were surrogate recoveries within control limits?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>DCB recovered low (13%) below the lower laboratory control limit of 14% of method 8081B/8082A in sample OWR-13F, but above the expanded lower acceptance limit defined in the NFG, 2020. Associated results are qualified as estimated (UJ).</u>
b) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Comments/Notes:

---

**Data Qualification:**

Sample Name	Constituent(s)	Result	Qualifier	Reason
OWR-14D	Total Pentachlorobiphenyls	<0.2 ug/L	UJ	Original and duplicate sample RPD not calculated due to a non-detect result.
Field Duplicate 2	Total Pentachlorobiphenyls	0.2 ug/L	J	Original and duplicate sample RPD not calculated due to a non-detect result.
OWR-13F	PCB-1016	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OWR-13F	PCB-1221	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OWR-13F	PCB-1232	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OWR-13F	PCB-1242	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OWR-13F	PCB-1248	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OWR-13F	PCB-1254	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OWR-13F	PCB-1260	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OWR-13F	PCB-1268	<0.5 ug/L	UJ	Low DCB surrogate recovery.

# Eurofins Savannah

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

## Qualifiers

### GC Semi VOA

Qualifier	Qualifier Description
S1-	Surrogate recovery exceeds control limits, low biased.

### Metals

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

## Job ID: 680-233701-1

---

### Laboratory: Eurofins Savannah

#### Narrative

---

#### Job Narrative 680-233701-1

#### Revision

The report being provided is a revision of the original report sent on 6/7/2023. The report (revision 1) is being revised due to: Client requested Beryllium be removed from some analyte lists..

#### Receipt

The samples were received on 4/18/2023 10:00 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 8 coolers at receipt time were 0.6°C, 0.8°C, 1.2°C, 1.8°C, 3.2°C, 3.7°C, 3.7°C and 4.5°C

#### Receipt Exceptions

One liter was received broken for the following sample:. T-18F (680-233701-16).

#### GC/MS VOA

Method 8260D: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batches 680-775776 and 680-775871.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### PCBs

Method 680: IS was double spiked inadvertently. (680-233550-A-1-B MS)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Pesticides/PCBs

Method 8081B\_8082A: Due an internal error the following samples were unable to be run for PCBs: OW-10 (680-23701-1), OW-10F (680-233701-2), Field Duplicate 3 (680-233701-3), Field Duplicate 3F (680-233701-4), WEL-01 (680-233701-7), WEL-1 (680-233701-8), T-04 (680-233701-9), T-04F (680-233701-10), T-18 (680-233701-13), T-18F (680-233701-14), T-20 (680-233701-19) and T-20F (680-233701-19).

Method 8081B\_8082A: Two surrogates are used for this analysis. The laboratory's SOP allows one of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: OWR-13F (680-233701-6). These results have been reported and qualified.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

# Client Sample Results

Note: Since laboratory accreditations are subject to change, Eurofins Environment Testing Southeast, LLC places the ownership of method, analyte & accreditation compliance upon our subcontract laboratories. This sample shipment is forwarded under chain-of-custody. If the laboratory does not currently maintain accreditation in the State of Origin listed above for analysis/tests/matrix being analyzed, the samples must be shipped back to the Eurofins Environment Testing Southeast, LLC laboratory or other instructions will be provided. Any changes to accreditation status should be brought to Eurofins Environment Testing Southeast, LLC attention immediately. If all requested accreditations are current to date, return the signed Chain of Custody attesting to said compliance to Eurofins Environment Testing Southeast, LLC.

# Login Sample Receipt Checklist

Client: GSI Environmental, Inc

Job Number: 680-233701-1

**Login Number: 233701**

**List Source: Eurofins Savannah**

**List Number: 1**

**Creator: Sims, Robert D**

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Question	Answer	Comment
The cooler's custody seal is intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable (</=6C, not frozen).	True	
Cooler Temperature is recorded.	True	
WV: Container Temperature is acceptable (</=6C, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	False	Containers recd broken. Sufficient sample in remaining containers for analysis.
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	False	Received project as a subcontract.
Sample custody seals are intact.	N/A	
VOA sample vials do not have headspace >6mm in diameter (none, if from WV)?	N/A	

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

h) Field Calibration within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
i) Notations of unacceptable field conditions/performances from field logs or field notes?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	

MW-12A was originally sampled on 11 April 2023. Following a shipping delay and subsequent indication by FedEx that the sample cooler had been lost, MW-12A was resampled on 15 April 2023 and sent to the laboratory for analysis. Subsequently, the original cooler containing the 11 April 2023 samples arrived at the laboratory in good condition. This laboratory report (680-233705-1) contains sample results for the second set of samples collected from MW-12A on 15 April 2023. However, only the original results from MW-12A samples collected on 11 April 2023 (see Laboratory Report No. 680-233553) will be considered in this report.

Does the laboratory narrative indicate deficiencies?  YES  NO  NA

Note Deficiencies: \_\_\_\_\_

Chain-of-Custody (COC)	YES	NO	NA	COMMENTS
a) Was the COC properly completed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Was the COC signed by both field and laboratory personnel?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Were samples received in good condition?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Were hold times met for sample pretreatment?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>Method 8141B in MW-14, OW-08A, and OW-21A was extracted outside of the 7-day holding time (8-9 days after sample collection). A strict interpretation of the NFG would reject the non-detect results of parathion and tetraethylthiopyrophosphate; however, the results were qualified as estimated (UJ) based on professional judgement and the following lines of evidence: 1. These sample results are in line with expected results: tetraethylthiopyrophosphate has never been detected in MW-14, and Parathion has only been detected once in MW-14 in the last ten years, just above the reporting limit; neither constituent has been detected in OW-08A in the previous ten years;</u>

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

and tetraethylthiopyrophosphate has not been detected in OW-21A in the previous 12 years. 2. The hold time exceedance is minor.

- |    |   |                                     |                                     |                          |   |

b) Were hold times met for sample analysis?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were the correct preservatives used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Was the correct method used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
e) Were appropriate reporting limits achieved?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Were any sample dilutions noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
g) Were any matrix problems noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

## QA LEVEL II - INORGANIC DATA EVALUATION CHECKLIST

Blanks	YES	NO	NA	COMMENTS
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<hr/>
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<hr/>
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<hr/>
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<hr/>

Laboratory Control Sample (LCS)	YES	NO	NA	COMMENTS
a) Was an LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<hr/>
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<hr/>
c) Was the LCS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<hr/>

Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<hr/>
b) Were field dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<hr/>
c) Were lab duplicates analyzed (note original and duplicate samples)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<hr/>
d) Were lab dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<hr/>

Blind Standards	YES	NO	NA	COMMENTS
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<hr/>
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<hr/>

Matrix Spike/Matrix Spike Duplicate (MS/MSD)	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<hr/>
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<hr/>
b) Was MSD accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<hr/>
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<hr/>
c) Were MS/MSD precision criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<hr/>

**Comments/Notes:**

680-233705-1

# Eurofins Savannah

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

## Qualifiers

### GC/MS Semi VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.

### GC Semi VOA

Qualifier	Qualifier Description
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
H	Sample was prepped or analyzed beyond the specified holding time. This does not meet regulatory requirements.
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
S1-	Surrogate recovery exceeds control limits, low biased.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

## Narrative

### Job Narrative 680-233705-1

#### Revision

The report being provided is a revision of the original report sent on 5/31/2023. The report (revision 1) is being revised due to client requested review of the PCB Aroclor data.

#### Receipt

The samples were received on 4/18/2023 10:00 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 4 coolers at receipt time were 0.7°C, 1.9°C, 2.7°C and 3.3°C

#### GC/MS VOA

Method 8260D: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 680-775776.

Method 8260D: The following sample was diluted due to the abundance of non-target analytes: OW-21A (680-233705-6). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC/MS Semi VOA

Method 8270D: The following analyte has been identified, in the reference method and/or via historical data, to be poor and/or erratic performers: 4-Nitrophenol. This analyte may have a %D >20% but must be <50%. If >50%, a CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte is considered estimated.

Method 8270D: The following sample was diluted to bring the concentration of target analytes within the calibration range: OW-21A (680-233705-6). Elevated reporting limits (RLs) are provided.

Method 8270D: The following sample was analyzed outside of holding time per client request: MW-12A (680-233705-2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC Semi VOA

Method 8141B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-609783.

Method 8141B: The following sample: MW-14 (680-233705-1) exhibited low turbidity.

Method 8141B: The following samples were analyzed outside of holding time due to a scheduling error: MW-14 (680-233705-1), OW-08A (680-233705-4) and OW-21A (680-233705-6).

Method 8141B: The following sample: OW-21A (680-233705-6) was pale yellow in color.

Method 8141B: The following sample in preparation batch 280-609783 and analytical batch 280-611241 was diluted to bring the concentration of target analytes within the calibration range: OW-21A (680-233705-6). Elevated reporting limits (RLs) are provided.

Method 8141B: The following sample in preparation batch 280-609783 and analytical batch 280-611241 required a dilution due to the nature of the sample matrix: OW-21A (680-233705-6). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

# Case Narrative

Client: GSI Environmental, Inc  
Project/Site: Anniston RCRA 2023

Job ID: 680-233705-1

---

## Job ID: 680-233705-1 (Continued)

---

### Laboratory: Eurofins Savannah (Continued)

#### Pesticides/PCBs

Method 8081B\_8082A: Surrogate recovery for the following sample was outside of acceptance limits: OW-21AF (680-233705-7). There was insufficient sample to perform a re-extraction; therefore, the data has been qualified and reported. The second bottle was inadvertently broken in lab.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**List Number: 1**

**Creator: Sims, Robert D**

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	N/A	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Company Name: GSI Environmental, Inc.  
 Project Name: CERCLA Groundwater Monitoring  
 Reviewer: Ellen Kainer

Project Manager: Noel Savoie  
 Project Number: 680-233802-1  
 Validation Date: 09/25/2023

Laboratory: Eurofins Savannah, Denver, and Lancaster Laboratories SDG #: 680-233802-1  
 Analytical Method (type and no.): VOCs (8260B), SVOCS (8270D), PCBs (8081B/8082A), Pesticides (8141B), PCB Homologs (680)  
 Matrix:  Air  Soil/Sed.  Water  Waste  \_\_\_\_\_  
 Sample Names: OWR-11, OWR-11F, Equipment Blank, Purge Water, Trip Blank20230417

**NOTE: Please provide calculation in Comment areas or on the back (if on the back please indicate in comment areas).**

Field Information	YES	NO	NA	COMMENTS
a) Sampling dates noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

e) Were appropriate reporting limits achieved?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Were any sample dilutions noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
g) Were any matrix problems noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Blanks	YES	NO	NA	COMMENTS
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

Laboratory Control Sample (LCS)	YES	NO	NA	COMMENTS
a) Was a LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Was the LCS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were field dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were lab duplicates analyzed (note original and duplicate samples)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Multiple LCS/LCSD pairs _____
d) Were lab dup. precision criteria met (note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	All RPDs < 11% _____

Blind Standards	YES	NO	NA	COMMENTS
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Matrix Spike/Matrix Spike Duplicate (MS/MSD)	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
b) Was MSD accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were MS/MSD precision criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Surrogate Spikes	YES	NO	NA	COMMENTS
Were surrogate recoveries within control limits?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>Decachlorobiphenyl (DCB) recovered low (below the lab standard of 14%) for sample OWR-11F for Aroclor analysis by method 8081B/8082A, but greater than the "expanded lower acceptance limit" of 10% specified in NFG, 2020. Associated sample results are qualified UJ. Decachlorobiphenyl (DCB) recovered low (below the lab standard of 14% and below the expanded lower acceptance limit of 10%) for Purgewater (8%) for Aroclor analysis by 8081B/8082A. A strict interpretation of the NFG would reject these non-detect results of PCB Aroclors; however, the results were qualified as estimated (UJ) based on professional judgement since PCB Aroclors have not been detected in the purgewater sample in the previous six years.</u>
a) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

Comments/Notes:

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

# Definitions/Glossary

Client: GSI Environmental, Inc  
Project/Site: Anniston CERCLA April 2023

Job ID: 680-233802-1

## Qualifiers

### GC Semi VOA

Qualifier	Qualifier Description
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
S1-	Surrogate recovery exceeds control limits, low biased.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

Client: GSI Environmental, Inc  
Project/Site: Anniston CERCLA April 2023

Job ID: 680-233802-1

---

## Job ID: 680-233802-1

---

### Laboratory: Eurofins Savannah

#### Narrative

---

#### Job Narrative 680-233802-1

#### Receipt

The samples were received on 4/19/2023 10:30 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 2.0°C and 2.3°C

#### GC/MS VOA

Method 8260D: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batches 680-775776 and 680-775852.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC/MS Semi VOA

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### PCBs

Method 680: IS was double spiked inadvertently. (680-233550-A-1-B MS)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC Semi VOA

Method 8141B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-609783.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Pesticides/PCBs

Method 8081B\_8082A: Surrogate recovery for the following sample was outside control limits: Purgewater (680-233802-3). Re-extraction and/or re-analysis was performed and surrogate recovery confirmed.

Method 8081B\_8082A: Two surrogates are used for this analysis. The laboratory's SOP allows one of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: OWR-11F (680-233802-2). These results have been reported and qualified.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is <math>\leq</math> background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

## Login Sample Receipt Checklist

Client: GSI Environmental, Inc

Job Number: 680-233802-1

**Login Number: 233802**

**List Number: 2**

**Creator: Rystrom, Joshua R**

**List Source: Eurofins Denver**

**List Creation: 04/22/23 10:47 AM**

Question	Answer	Comment
Radioactivity wasn't checked or is <math>\leq</math> background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	N/A	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

# Login Sample Receipt Checklist

Client: GSI Environmental, Inc

Job Number: 680-233802-1

**Login Number: 233802**

**List Source: Eurofins Lancaster Laboratories Environment Testing, LLC**

**List Number: 3**

**List Creation: 04/25/23 12:45 PM**

<b>Question</b>	<b>Answer</b>	<b>Comment</b>
The cooler's custody seal is intact.	N/A	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable (</=6C, not frozen).	True	
Cooler Temperature is recorded.	True	
WV: Container Temperature is acceptable (</=6C, not frozen).	N/A	
WV: Container Temperature is recorded.	N/A	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
There are no discrepancies between the containers received and the COC.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
There is sufficient vol. for all requested analyses.	True	
Is the Field Sampler's name present on COC?	False	Received project as a subcontract.
Sample custody seals are intact.	N/A	
VOA sample vials do not have headspace >6mm in diameter (none, if from WV)?	N/A	

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Company Name: GSI Environmental, Inc.  
 Project Name: RCRA Groundwater Monitoring  
 Reviewer: Jessica Alanis

Project Manager: Noel Savoie  
 Project Number: 680-233804-1  
 Validation Date: 08/31/2023

Laboratory: Eurofins Savannah and Denver Laboratories SDG #: 680-233804-1  
 Analytical Method (type and no.): VOCs (8260B), SVOCS (8270D), PCBs (8081A/8082B), Pesticides (8141B)  
 Matrix:  Air  Soil/Sed.  Water  Waste   
 Sample Names: OW-15, OW-15F, OW-16A, OW-16AF, Trip blank 20230417

**NOTE: Please provide calculation in Comment areas or on the back (if on the back please indicate in comment areas).**

Field Information	YES	NO	NA	COMMENTS
a) Sampling dates noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Sampling team indicated?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Sample location noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
d) Sample depth indicated (Soils)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	
e) Sample type indicated (grab/composite)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
f) Field QC noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Trip blank 20230417</u>
g) Field parameters collected (note types)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Temp., pH, sp. cond., DO, ORP, turbidity</u>
h) Field Calibration within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
i) Notations of unacceptable field conditions/performances from field logs or field notes?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
j) Does the laboratory narrative indicate deficiencies?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

Note Deficiencies: Surrogate 2,4,6-Tribromophenol in Method 8270D CCV was outside method criteria; however, all associated samples were within control limits for this surrogate, no qualification is made on this basis. The laboratory identified 4-Nitrophenol as a poor/erratic performer, indicating any detection should be considered estimated; however, this analyte was not detected in the samples, no qualification is made on this basis. Internal standard recoveries for method 8141B in OW-15 exceeded control limits on one column, but met the limit on the other, so no qualification is made on this basis.

Chain-of-Custody (COC)	YES	NO	NA	COMMENTS
a) Was the COC properly completed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Was the COC signed by both field and laboratory personnel?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Were samples received in good condition?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Were hold times met for sample pretreatment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
b) Were hold times met for sample analysis?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
c) Were the correct preservatives used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
d) Was the correct method used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
e) Were appropriate reporting limits achieved?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>1,2,4-Trichlorobenzene RL in sample OW-16A and the Method Blank is elevated (5 ug/L) above the designated 1 ug/L RL. The OW-16A sample result is above this elevated RL and no other sample has detections of 1,2,4-Trichlorobenzene; therefore, no data is qualified on this basis.</u>
f) Were any sample dilutions noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Parathion in sample OW-16A, DF = 2. Chlorobenzene and 1,2,4-Trichlorobenzene in OW-16A, DF = 5.</u>
g) Were any matrix problems noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Blanks	YES	NO	NA	COMMENTS
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

Laboratory Control Sample (LCS)	YES	NO	NA	COMMENTS
a) Was a LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Was the LCS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were field dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were lab duplicates analyzed (note original and duplicate samples)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Multiple LCSDs</u>
d) Were lab dup. precision criteria met (note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>All LCS/LCSD RPDs &lt;13%</u>

Blind Standards	YES	NO	NA	COMMENTS
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Matrix Spike/Matrix Spike Duplicate (MS/MSD)	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
b) Was MSD accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were MS/MSD precision criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Surrogate Spikes	YES	NO	NA	COMMENTS
a) Were surrogate recoveries within control limits?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>DCB recovered low (12%) below the lower laboratory control limit of 14% of method 8081B/8082A in sample OW-15F, but above the expanded lower acceptance limit defined in the NFG, 2020. Associated results are qualified as estimated (UJ). DCB recovered low (below the lab standard of 14% and below the expanded lower acceptance limit of 10%) for sample OW-16AF (6%) for Aroclor analysis by 8081B/8082A. A strict interpretation of the NFG would reject these non-detect results of PCB Aroclors; however, the results were qualified as estimated (UJ) based on professional judgement since these sample results are in line with expected results as PCB Aroclors have only been detected once in the last 19 years in the filtered sample collected at OW-16A, and only when the unfiltered total PCBs were approximately 5 times greater than unfiltered total PCBs in OW-16AF from this sampling event.</u>
b) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Comments/Notes:

---

**Data Qualification:**

Sample Name	Constituent(s)	Result	Qualifier	Reason
OW-15F	PCB-1016	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OW-15F	PCB-1221	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OW-15F	PCB-1232	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OW-15F	PCB-1242	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OW-15F	PCB-1248	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OW-15F	PCB-1254	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OW-15F	PCB-1260	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OW-15F	PCB-1268	<0.5 ug/L	UJ	Low DCB surrogate recovery.
OW-16AF	PCB-1016	<0.5 ug/L	UJ	Low DCB surrogate recovery below the expanded lower acceptance limit.
OW-16AF	PCB-1221	<0.5 ug/L	UJ	Low DCB surrogate recovery below the expanded lower acceptance limit.
OW-16AF	PCB-1232	<0.5 ug/L	UJ	Low DCB surrogate recovery below the expanded lower acceptance limit.
OW-16AF	PCB-1242	<0.5 ug/L	UJ	Low DCB surrogate recovery below the expanded lower acceptance limit.
OW-16AF	PCB-1248	<0.5 ug/L	UJ	Low DCB surrogate recovery below the expanded lower acceptance limit.
OW-16AF	PCB-1254	<0.5 ug/L	UJ	Low DCB surrogate recovery below the expanded lower acceptance limit.
OW-16AF	PCB-1260	<0.5 ug/L	UJ	Low DCB surrogate recovery below the expanded lower acceptance limit.
OW-16AF	PCB-1268	<0.5 ug/L	UJ	Low DCB surrogate recovery below the expanded lower acceptance limit.

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

## Qualifiers

### GC Semi VOA

Qualifier	Qualifier Description
D	Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
S1-	Surrogate recovery exceeds control limits, low biased.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

Client: GSI Environmental, Inc

**Job ID: 680-233804-1**

**Laboratory: Eurofins Savannah**

## Narrative

### Job Narrative 680-233804-1

#### Revision

The report being provided is a revision of the original report sent on 5/9/2023. The report (revision 1) is being revised due to a data review for OW-16A (680-233804-3), which resulted in a correction for an incorrect upload.

#### Receipt

The samples were received on 4/19/2023 10:30 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 3.7°C

#### GC/MS VOA

Method 8260D: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 680-775776.

Method 8260D: The following sample was diluted to bring the concentration of target analytes within the calibration range: OW-16A (680-233804-3). Elevated reporting limits (RLs) are provided.

Method 8260D: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 680-775852.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC/MS Semi VOA

Method 8270D: The continuing calibration verification (CCV) analyzed in batch 680-776070 was outside the method criteria for the following surrogate: 2,4,6-Tribromophenol (Surr). The affected surrogate was however within surrogate control limits in the CCV. All associated batch QC and samples were also within control limits for this surrogate.

Method 8270D: The following analyte has been identified, in the reference method and/or via historical data, to be poor and/or erratic performers: 4-Nitrophenol. This analyte may have a %D >20% but must be <50%. If >50%, a CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC Semi VOA

Method 8141B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-609783 method: 8141.

Method 8141B: Internal standard (ISTD) response for the following sample in preparation batch 280-609783 and analytical batch 280-610700 exceeded the control limit on the secondary column: OW-15 (680-233804-1). As such, the sample results associated with this ISTD were reported from the other column, which met ISTD acceptance criteria.

Method 8141B: Internal Standard (ISTD) retention times for Tributyl phosphate in the following sample in preparation batch 280-609783 and analytical batch 280-610700 were outside the acceptance criteria of +/-0.03 minutes from the CCVIS: (MB 280-609783/1-A). The internal standard is not associated with any requested analytes; therefore the data is reported.

Method 8141B: The following sample in preparation batch 280-609783 and analytical batch 280-611241 was diluted to bring the concentration of target analytes within the calibration range: OW-16A (680-233804-3). Elevated reporting limits (RLs) are provided.

Method 8141B: Internal Standard (ISTD) retention times for Tributyl phosphate in the following sample in analytical batch 280-611241 were outside the acceptance criteria of +/-0.03 minutes from the mid-point of the initial calibration: (CCVIS 280-611241/5). The internal standard is not associated with any requested analytes; therefore the data is reported.

# Case Narrative

Client: GSI Environmental, Inc  
Project/Site: Anniston RCRA 2023

Job ID: 680-233804-1

---

## Job ID: 680-233804-1 (Continued)

---

### Laboratory: Eurofins Savannah (Continued)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Pesticides/PCBs

Method 8081B\_8082A: Surrogate recovery for the following sample was outside control limits: OW-16AF (680-233804-4). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

Method 8081B\_8082A: Two surrogates are used for this analysis. The laboratory's SOP allows one of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following sample contained an allowable number of surrogate compounds outside limits: OW-15F (680-233804-2). These results have been reported and qualified.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

# Login Sample Receipt Checklist

Client: GSI Environmental, Inc

Job Number: 680-233804-1

**Login Number: 233804**

**List Source: Eurofins Savannah**

**List Number: 1**

**Creator: Johnson, Corey M**

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Company Name: GSI Environmental, Inc.  
 Project Name: CERCLA Groundwater Monitoring  
 Reviewer: Ellen Kainer

Project Manager: Noel Savoie  
 Project Number: 680-236362-1  
 Validation Date: 09/26/2023

Laboratory: Eurofins Savannah SDG #: 680-236362-1

Analytical Method (type and no.): PCBs (8081B/8082A)

Matrix:  Air  Soil/Sed.  Water  Waste

Sample Names: T-20F, T-04, T-04F, OW-10, OW-10F, WEL-01, WEL-01F, T-20, T-18F, T-18, Field Duplicate 3, Field Duplicate 3F, Equipment Blank

**NOTE: Please provide calculation in Comment areas or on the back (if on the back please indicate in comment areas).**

Field Information	YES	NO	NA	COMMENTS
a) Sampling dates noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Sampling team indicated?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Sample location noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Sample depth indicated (Soils)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
e) Sample type indicated (grab/composite)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Field QC noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Field Duplicate 3 (@ OW-10), Field Duplicate 3F (@ OW-10F), and Equipment Blank, MS/MSD (@ OW-10)</u>
g) Field parameters collected (note types)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Temp., pH, sp. cond., DO, ORP, turbidity</u>
h) Field Calibration within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
i) Notations of unacceptable field conditions/performances from field logs or field notes?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
j) Does the laboratory narrative indicate deficiencies?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

Chain-of-Custody (COC)	YES	NO	NA	COMMENTS
a) Was the COC properly completed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the COC signed by both field and laboratory personnel?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were samples received in good condition?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Were hold times met for sample pretreatment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were hold times met for sample analysis?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were the correct preservatives used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Was the correct method used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
e) Were appropriate reporting limits achieved?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Were any sample dilutions noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
g) Were any matrix problems noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

<b>Blanks</b>	<b>YES</b>	<b>NO</b>	<b>NA</b>	<b>COMMENTS</b>
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
<b>Laboratory Control Sample (LCS)</b>	<b>YES</b>	<b>NO</b>	<b>NA</b>	<b>COMMENTS</b>
a) Was a LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Was the LCS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
<b>Duplicates</b>	<b>YES</b>	<b>NO</b>	<b>NA</b>	<b>COMMENTS</b>
Were field duplicates collected (note original and duplicate sample names)? and Field Duplicate 3F	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Originals: OW-10 and OW-10F</u> <u>Duplicates (respectively): Field Duplicate 3</u>
d) Were field dup. precision criteria met (note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>All original and duplicate samples ND</u>
e) Were lab duplicates analyzed (note original and duplicate samples)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
f) Were lab dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
<b>Blind Standards</b>	<b>YES</b>	<b>NO</b>	<b>NA</b>	<b>COMMENTS</b>
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
<b>Matrix Spike/Matrix Spike Duplicate (MS/MSD)</b>	<b>YES</b>	<b>NO</b>	<b>NA</b>	<b>COMMENTS</b>
a) Was MS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
b) Was MSD accuracy criteria met?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>MSD recovery of PCB-1016 by method 8081B/ 8082A was high, above the laboratory standard of 130%. All associated sample results are non-detect; therefore, no qualification is made on this basis.</u>
Recovery could not be calculated since these sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were MS/MSD precision criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
<b>Surrogate Spikes</b>	<b>YES</b>	<b>NO</b>	<b>NA</b>	<b>COMMENTS</b>
a) Were surrogate recoveries within control limits?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>Decachlorobiphenyl (DCB) recovered low (below the lab standard of 14% and below the expanded lower acceptance limit of 10%) for sample T-18 (8%) for Aroclor analysis by 8081B/8082A. A strict interpretation of the NFG would indicate the detected results be qualified as estimated (J) and that the non-detect results be rejected; however, the non-detect results were qualified as estimated (UJ) based on professional judgement since these sample results are in line with expected results as all of the non-detect PCB Aroclors have never been detected in T-18.</u>
b) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Comments/Notes:

---

Data Qualification:

Sample Name	Constituent(s)	Result	Qualifier	Reason
T-18	PCB-1016	<0.5 ug/L	UJ	Low DCB surrogate recovery
T-18	PCB-1221	16	J	Low DCB surrogate recovery
T-18	PCB-1232	<0.5 ug/L	UJ	Low DCB surrogate recovery
T-18	PCB-1242	<0.5 ug/L	UJ	Low DCB surrogate recovery
T-18	PCB-1248	<0.5 ug/L	UJ	Low DCB surrogate recovery
T-18	PCB-1254	<0.5 ug/L	UJ	Low DCB surrogate recovery
T-18	PCB-1260	<0.5 ug/L	UJ	Low DCB surrogate recovery
T-18	PCB-1268	<0.5 ug/L	UJ	Low DCB surrogate recovery

# Eurofins Savannah

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

# Definitions/Glossary

Client: GSI Environmental, Inc  
Project/Site: Anniston CERCLA June 2023

Job ID: 680-236362-1

## Qualifiers

### GC Semi VOA

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
S1-	Surrogate recovery exceeds control limits, low biased.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
▫	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

Client: GSI Environmental, Inc  
Project/Site: Anniston CERCLA June 2023

Job ID: 680-236362-1

---

**Job ID: 680-236362-1**

---

**Laboratory: Eurofins Savannah**

---

**Narrative**

**Job Narrative  
680-236362-1**

**Receipt**

The samples were received on 6/15/2023 10:19 AM and 6/16/2023 10:08 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 4 coolers at receipt time were 0.2°C, 0.8°C, 1.2°C and 3.8°C

**Receipt Exceptions**

Only one cooler out of four was received on 6/15/2023: T-20F (680-236362-1), T-04 (680-236362-2) and T-04F (680-236362-3) The other three coolers were received 6/16/2023.

**Pesticides/PCBs**

Method 8081B\_8082A: Surrogate recovery for the following sample was outside control limits: T-18 (680-236448-14). Re-extraction and/or re-analysis was performed and surrogate recovery was outside control limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Client: GSI Environmental, Inc

Job Number: 680-236362-1

**Login Number: 236362**

**List Number: 1**

**Creator: Padayao, Abigail**

**List Source: Eurofins Savannah**

Question	Answer	Comment
Radioactivity wasn't checked or is <=/ background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	N/A	Refer to Job Narrative for details.
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Company Name: GSI Environmental, Inc.  
 Project Name: CERCLA Groundwater Monitoring  
 Reviewer: Jessica Alanis

Project Manager: Noel Savoie  
 Project Number: 680-238921-1  
 Validation Date: 08/28/2023

Laboratory: Eurofins Savannah and Denver Laboratories      SDG #: 680-238921-1  
 Analytical Method (type and no.): SVOCS (8270D), PCBs (8081B/8082A), Pesticides (8141B)  
 Matrix:  Air     Soil/Sed.     Water     Waste     \_\_\_\_\_  
 Sample Names: T-09-R, T-09-RF, Field Duplicate 4, Purge Water

**NOTE: Please provide calculation in Comment areas or on the back (if on the back please indicate in comment areas).**

Field Information	YES	NO	NA	COMMENTS
a) Sampling dates noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Sampling team indicated?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Sample location noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Sample depth indicated (Soils)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
e) Sample type indicated (grab/composite)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Field QC noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Field Duplicate 4 (collected at T-09-R)</u>
g) Field parameters collected (note types)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Temp., pH, sp. cond., DO, ORP, turbidity</u>
h) Field Calibration within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
i) Notations of unacceptable field conditions/performances from field logs or field notes?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
j) Does the laboratory narrative indicate deficiencies?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

Note Deficiencies: The laboratory indicated that insufficient sample volume was available to perform an LCS MS/MSD for Method 8141B. However, site-specific field samples were not submitted for MS/MSD analysis with this laboratory report; therefore, no qualification is made on this basis.

Chain-of-Custody (COC)	YES	NO	NA	COMMENTS
a) Was the COC properly completed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the COC signed by both field and laboratory personnel?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were samples received in good condition?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Were hold times met for sample pretreatment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were hold times met for sample analysis?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were the correct preservatives used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Was the correct method used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
e) Were appropriate reporting limits achieved?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Were any sample dilutions noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
g) Were any matrix problems noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Blanks	YES	NO	NA	COMMENTS
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Laboratory Control Sample (LCS)	YES	NO	NA	COMMENTS
a) Was a LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Was the LCS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Original = T-09-R</u> _____
b) Were field dup. precision criteria met (note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Duplicate = Field Duplicate 4</u> _____
c) Were lab duplicates analyzed (note original and duplicate samples)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>T-09-R and Field Duplicate 4 results all ND</u> _____
d) Were lab dup. precision criteria met (note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Multiple LCS/LCSD pairs</u> _____
				<u>All RPDs ≤ 39%</u> _____

Blind Standards	YES	NO	NA	COMMENTS
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Matrix Spike/Matrix Spike Duplicate (MS/MSD)	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
b) Was MSD accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were MS/MSD precision criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Surrogate Spikes	YES	NO	NA	COMMENTS
a) Were surrogate recoveries within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>The RPD between the primary and confirmation columns of method 8081B/8082A surrogates in T-09-RF was &gt;40%. The lower value was reported which was within control limits; therefore, no sample results are qualified on this basis.</u> _____
b) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

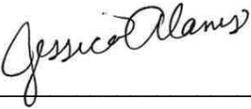

**Comments/Notes:**

No data requires qualification.

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

# Definitions/Glossary

Client: GSI Environmental, Inc  
Project/Site: Anniston CERCLA

Job ID: 680-238921-1

## Qualifiers

### GC Semi VOA

Qualifier	Qualifier Description
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

Client: GSI Environmental, Inc  
Project/Site: Anniston CERCLA

Job ID: 680-238921-1

---

## Job ID: 680-238921-1

---

### Laboratory: Eurofins Savannah

#### Narrative

---

#### Job Narrative 680-238921-1

#### Revision

The report being provided is a revision of the original report sent on 8/28/2023. The report (revision 1) is being revised due to provide missing LCS for method 8081/8082.

#### Receipt

The samples were received on 8/10/2023 10:25 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 3.0°C

#### GC/MS Semi VOA

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### GC Semi VOA

Method 8141B: Insufficient sample volume was available to perform a laboratory control sample LCS matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 280-622931. An LCSD was prepared instead. Method: 3510C-8141

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

#### Pesticides/PCBs

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Company Name: GSI Environmental, Inc.  
 Project Name: RCRA Groundwater Monitoring  
 Reviewer: Ellen Kainer

Project Manager: Noel Savoie  
 Project Number: 680-241901-1  
 Validation Date: 12/08/2023

Laboratory: Eurofins Savannah, Denver, Laboratories SDG #: 680-241901-1  
 Analytical Method (type and no.): VOCs (8260B), SVOCS (8270D), PCBs (8081B/8082A), Pesticides (8141B)  
 Matrix:  Air  Soil/Sed.  Water  Waste  \_\_\_\_\_  
 Sample Names: MW-01B, MW-11A, MW-12A, MW-13A-R, Trip Blank 20231018

**NOTE: Please provide calculation in Comment areas or on the back (if on the back please indicate in comment areas).**

Field Information	YES	NO	NA	COMMENTS
a) Sampling dates noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Sampling team indicated?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Sample location noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Sample depth indicated (Soils)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
e) Sample type indicated (grab/composite)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Field QC noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Trip Blank 20231018</u>
g) Field parameters collected (note types)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>Temp., pH, Sp. Cond., DO, ORP, turbidity</u>
h) Field Calibration within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
i) Notations of unacceptable field conditions/performances from field logs or field notes?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
j) Does the laboratory narrative indicate deficiencies?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
Note Deficiencies: _____				

Chain-of-Custody (COC)	YES	NO	NA	COMMENTS
a) Was the COC properly completed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the COC signed by both field and laboratory personnel?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were samples received in good condition?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

General (reference QAPP or Method)	YES	NO	NA	COMMENTS
a) Were hold times met for sample pretreatment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were hold times met for sample analysis?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Were the correct preservatives used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
d) Was the correct method used?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
e) Were appropriate reporting limits achieved?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
f) Were any sample dilutions noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
g) Were any matrix problems noted?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Blanks	YES	NO	NA	COMMENTS
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

Laboratory Control Sample (LCS)	YES	NO	NA	COMMENTS
a) Was a LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Was the LCS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
Were field dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
b) Were lab duplicates analyzed (note original and duplicate samples)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Multiple LCS/LCSD pairs
c) Were lab dup. precision criteria met (note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	All LCSD RPDs <10%

Blind Standards	YES	NO	NA	COMMENTS
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Matrix Spike/Matrix Spike Duplicate (MS/MSD)	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met? (8260D) however, project-specific MS/MSD samples were not submitted with this lab report; therefore, no results are qualified on this basis.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	Insufficient sample volume for MS/MSD
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
b) Was MSD accuracy criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were MS/MSD precision criteria met?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Surrogate Spikes	YES	NO	NA	COMMENTS
a) Were surrogate recoveries within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

# Eurofins Savannah

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

## Qualifiers

### GC Semi VOA

Qualifier	Qualifier Description
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

Client: GSI Environmental, Inc  
Project/Site: Anniston RCRA

Job ID: 680-241901-1

**Job ID: 680-241901-1**

**Laboratory: Eurofins Savannah**

## Narrative

### Job Narrative 680-241901-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method. Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

### Receipt

The samples were received on 10/19/2023 9:56 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 0.8°C and 0.9°C

### GC/MS VOA

Method 8260D: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 680-804460.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### GC/MS Semi VOA

Method 8270D: The following analytes have been identified, in the reference method and/or via historical data, to be poor and/or erratic performers: o,o',o''-Triethylphosphorothioate. o,o',o''-Triethylphosphorothioate may have a %D >20% but must be <50%. If >50%, a CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### GC Semi VOA

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### PCBs

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is <math>\leq</math> background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

g) Were any matrix problems noted?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<u>MW-16 was pale yellow in color.</u>

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

Blanks	YES	NO	NA	COMMENTS
a) Were analytes detected in the method blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Were analytes detected in the field blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
c) Were analytes detected in the equipment blank(s)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____
d) Were analytes detected in the trip blank(s)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

Laboratory Control Sample (LCS)	YES	NO	NA	COMMENTS
a) Was a LCS analyzed once per SDG?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were the proper compounds included in the LCS?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
c) Was the LCS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

Duplicates	YES	NO	NA	COMMENTS
a) Were field duplicates collected (note original and duplicate sample names)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Original – MW-20A _____
	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Duplicate – Duplicate _____
b) Were field dup. precision criteria met (note RPD)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>O,O,O-triethylphosphorothioate met</u> precision criteria (Original = 59 ug/L; Duplicate = 69 ug/L; RPD = 16%). Chlorobenzene did not meet precision criteria because the RPD was not calculated due to a non-detect result (Original = <1 ug/L; Duplicate = 1.4 ug/L). _____
c) Were lab duplicates analyzed (note original and duplicate samples)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	One LCSD; Original - LCS 680-805602/6 _____
	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Duplicate - LCSD 680-805602/7 _____
d) Were lab dup. precision criteria met (note RPD)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	RPD=8 _____

Blind Standards	YES	NO	NA	COMMENTS
a) Was a blind standard used (indicate name, compounds included and concentrations)?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was the %D within control limits?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	_____

Matrix Spike/Matrix Spike Duplicate (MS/MSD)	YES	NO	NA	COMMENTS
a) Was MS accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
b) Was MSD accuracy criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
Recovery could not be calculated since sample contained high concentration of analyte?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____
c) Were MS/MSD precision criteria met?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	All RPDs <24% _____

Surrogate Spikes	YES	NO	NA	COMMENTS
a) Were surrogate recoveries within control limits?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
b) Were surrogate recoveries not calculated due to dilutions?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	_____

Comments/Notes:

---

## QA LEVEL II - ORGANIC DATA EVALUATION CHECKLIST

### Data Qualification:

Sample Name	Constituent(s)	Result	Qualifier	Reason
MW-20A	Chlorobenzene	<1 ug/L	UJ	RPD between original and duplicate not calculated due to a non-detect result.
Duplicate	Chlorobenzene	1.4 ug/L	J	RPD between original and duplicate not calculated due to a non-detect result.

# ANALYTICAL REPORT

## PREPARED FOR

Attn: Ben Smith  
GSI Environmental, Inc  
2211 Norfolk, Suite 1000  
Houston, Texas 77098-4044

Generated 11/14/2023 11:28:43 PM

## JOB DESCRIPTION

Anniston RCRA

## JOB NUMBER

680-241967-1

# Eurofins Savannah

## Job Notes

This report may not be reproduced except in full, and with written approval from the laboratory. The results relate only to the samples tested. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins Environment Testing Southeast, LLC Project Manager.

## Qualifiers

### GC Semi VOA

Qualifier	Qualifier Description
p	The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.
S1-	Surrogate recovery exceeds control limits, low biased.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

Client: GSI Environmental, Inc  
Project/Site: Anniston RCRA

Job ID: 680-241967-1

**Job ID: 680-241967-1**

**Laboratory: Eurofins Savannah**

## Narrative

### Job Narrative 680-241967-1

Analytical test results meet all requirements of the associated regulatory program listed on the Accreditation/Certification Summary Page unless otherwise noted under the individual analysis. Data qualifiers are applied to indicate exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD may be performed, unless otherwise specified in the method. Surrogate and/or isotope dilution analyte recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

### Receipt

The samples were received on 10/20/2023 10:32 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperatures of the 3 coolers at receipt time were 0.9°C, 1.5°C and 2.4°C

### GC/MS VOA

Method 8260D: The following samples were diluted due to the abundance of non-target analytes: MW-20A (680-241967-1) and MW-16 (680-241967-2). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### GC/MS Semi VOA

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### GC Semi VOA

Method 8141B: The following sample MW-16 (680-241967-2) in preparation batch 280-630898 were yellow in color.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### PCBs

Method 8082A: Surrogate recovery for the following sample was outside control limits: MW-16 (680-241967-2). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

### Metals

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

# Sample Summary

# Detection Summary

Client: GSI Environmental, Inc  
Project/Site: Anniston RCRA

Job ID: 680-241967-1

## Client Sample ID: MW-20A

Lab Sample ID: 680-241967-1

Analyte	Result	Qualifier	RL	MDL	Unit	Dil Fac	D	Method	Prep Type
o,o',o"-Triethylphosphorothioate	59		10	0.97	ug/L	1		8270D	Total/NA

## Client Sample ID: MW-16

Lab Sample ID: 680-241967-2

Analyte	Result	Qualifier	RL	MDL	Unit	Dil Fac	D	Method	Prep Type
4-Nitrophenol	97		25	1.8	ug/L	1		8270D	Total/NA
o,o',o"-Triethylphosphorothioate	68		10	0.96	ug/L	1		8270D	Total/NA

## Client Sample ID: MW-15

Lab Sample ID: 680-241967-3

No Detections.

## Client Sample ID: Duplicate

Lab Sample ID: 680-241967-4

Analyte	Result	Qualifier	RL	MDL	Unit	Dil Fac	D	Method	Prep Type
Chlorobenzene	1.4		1.0	0.15	ug/L	1		8260D	Total/NA
o,o',o"-Triethylphosphorothioate	69		10	0.98	ug/L	1		8270D	Total/NA

## Client Sample ID: Trip Blank 20231019 518

Lab Sample ID: 680-241967-5

No Detections.

This Detection Summary does not include radiochemical test results.

# Client Sample Results

Client: GSI Environmental, Inc  
Project/Site: Anniston RCRA

Job ID: 680-241967-1

**Client Sample ID: MW-20A**

**Lab Sample ID: 680-241967-1**

**Date Collected: 10/18/23 13:26**

**Matrix: Water**

**Date Received: 10/20/23 10:32**

## Method: SW846 8260D - Volatile Organic Compounds by GC/MS

Analyte	Result	Qualifier	RL	MDL	Unit	D	Prepared	Analyzed	Dil Fac
Chlorobenzene	<1.0		1.0	0.75	ug/L			11/01/23 00:41	5
Surrogate	%Recovery	Qualifier	Limits				Prepared	Analyzed	Dil Fac
Toluene-d8 (Surr)	111		70 - 130					11/01/23 00:41	5
1,2-Dichloroethane-d4 (Surr)	81		60 - 124					11/01/23 00:41	5
Dibromofluoromethane (Surr)	108		70 - 130					11/01/23 00:41	5
4-Bromofluorobenzene (Surr)	104		70 - 130					11/01/23 00:41	5

## Method: SW846 8270D - Semivolatile Organic Compounds (GC/MS)

Analyte	Result	Qualifier	RL	MDL	Unit	D	Prepared	Analyzed	Dil Fac
4-Nitrophenol	<25		25	1.8	ug/L		10/25/23 18:45	11/04/23 23:48	1
<b>o,o',o"-Triethylphosphorothioate</b>	<b>59</b>		10	0.97	ug/L		10/25/23 18:45	11/04/23 23:48	1
Surrogate	%Recovery	Qualifier	Limits				Prepared	Analyzed	Dil Fac
2-Fluorobiphenyl	59		32 - 113				10/25/23 18:45	11/04/23 23:48	1
2-Fluorophenol	53		26 - 109				10/25/23 18:45	11/04/23 23:48	1
Nitrobenzene-d5	63		32 - 118				10/25/23 18:45	11/04/23 23:48	1
Phenol-d5	54		27 - 110				10/25/23 18:45	11/04/23 23:48	1
Terphenyl-d14	41		10 - 126				10/25/23 18:45	11/04/23 23:48	1
2,4,6-Tribromophenol	69		39 - 124				10/25/23 18:45	11/04/23 23:48	1

## Method: SW846 8082A - Polychlorinated Biphenyls (PCBs) by Gas Chromatography

Analyte	Result	Qualifier	RL	MDL	Unit	D	Prepared	Analyzed	Dil Fac
PCB-1016	<0.50		0.50	0.084	ug/L		10/29/23 11:10	11/01/23 21:41	1

# Method Summary

Client: GSI Environmental, Inc  
Project/Site: Anniston RCRA

Job ID: 680-241967-1

Method	Method Description	Protocol	Laboratory
8260D	Volatile Organic Compounds by GC/MS	SW846	EET SAV
8270D	Semivolatile Organic Compounds (GC/MS)	SW846	EET SAV
8082A	Polychlorinated Biphenyls (PCBs) by Gas Chromatography	SW846	EET SAV
8141B	Organophosphorous Compounds by Gas Chromatography, Capillary Column Technique	SW846	EET DEN
6010D	Metals (ICP)	SW846	EET SAV
3005A	Preparation, Total Recoverable or Dissolved Metals	SW846	EET SAV
3510C	Liquid-Liquid Extraction (Separatory Funnel)	SW846	EET DEN
3510C	Liquid-Liquid Extraction (Separatory Funnel)	SW846	EET SAV
3520C	Liquid-Liquid Extraction (Continuous)	SW846	EET SAV
5030C	Purge and Trap	SW846	EET SAV

Question	Answer	Comment
Radioactivity wasn't checked or is <math>\leq</math> background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A
