RE: Revised Remedial Design Work Plan
Remedial Design/Remedial Action Consent Decree for Portions of OU-1/OU-2
Anniston PCB Site (Docket No. I :02-cv-749-KOB)
Anniston, Alabama

Dear Ms. Langston Scully:

Attached please find the revised Remedial Design Work Plan (RDWP) for portions of Operable Unit 1/Operable Unit 2 (OU-1/OU-2) of the Anniston PCB Site. The revised RDWP was prepared by Pharmacia LLC/Solutia Inc. (P/S) and is being submitted to the United States Environmental Protection Agency (USEPA) for review and approval. The RDWP was revised to address comments from USEPA that were received by P/S on July 20, 2021. The milestone schedule presented in the revised RDWP (Table 6-1) was also updated to reflect the current status of submittals under the Remedial Design/Remedial Action Consent Decree (CD). Following USEPA approval of the RDWP, this table will be updated monthly and included with the monthly progress report for the Anniston PCB Site.

The RDWP is also consistent with the CD and the requirements of Section 3 of the Scope of Work (SOW: Appendix B to the CD). The requisite supporting documents for the RDWP are consistent with the requirements of Section 6.7 of the SOW and include an Emergency Response Plan and a Health and Safety Plan. These two supporting documents are provided as Appendix A and Appendix B to the RDWP, respectively. Consistent with our discussions, a series of tables with the Applicable or Relevant and Appropriate Requirements (ARARs) identified in the OU-1/OU-2 Record of Decision (ROD) are included as Appendix C to the RDWP.

Please contact me directly with any questions.

Sincerely,

E. Gayle Macolly
Manager, Remedial Projects
Solutia Inc.
