

Quality products from Eastman for the food market

Food processors worldwide seek quality ingredients to improve food and beverages. At Eastman, we're committed to meeting those needs.

Eastman Sustane™ SAIB (sucrose acetate isobutyrate), food grade, kosher is used primarily in citrus beverages as a weighting agent or flavor emulsion stabilizer to prevent separation of essential flavoring oils.

We also manufacture Eastman Tenox™ food grade, kosher antioxidants. Available in solid form and easy-to-use solution formulations, they contain various combinations of antioxidants and citric acid as an acid synergist.

Our dependable supply and extensive experience in meeting customer and market needs are backed by strong manufacturing knowledge, excellent technical service and exceptional problem-solving capabilities.

In addition, Eastman has implemented third-party certification outlined by Global Food Safety Initiative (GFSI) requirements, particularly Food Safety System Certification (FSSC) 22000, for several food grade products. For European certification numbers for food grade products, visit eastman.com.

Antioxidants

- Tenox TBHQ (tertiary butylhydroquinone)
- Tenox antioxidant solutions
 - Tenox 4, food grade
 - Tenox 20A, food grade
 - Tenox 8, food grade
