Tritan™ Renew

Elevate your food storage sustainability.

Top-shelf storage quality

Eastman Tritan™ Renew is your solution for superior food storage that exceeds performance expectations without compromising design aesthetics, so brands can bring the most innovative and sustainable products to consumers.

Clarity — Tritan Renew creates food storage containers for your refrigerator, pantry or breakfast table that dazzle with glasslike clarity and gloss.

Durability — Tritan Renew is nearly unbreakable, shatter resistant and stands up to daily use.

Temperature stability — Containers made with our material can go straight from the freezer to the microwave without cracking.

Dishwasher safe — Through daily use and hundreds of dishwasher cycles, Tritan Renew maintains its clarity.

Food-contact ready — Our materials are free of BPA and BPS.

Odor and taste resistant — Whether you're storing wet or dry food, Tritan Renew prevents tastes and odors from carrying over between washes.

Good for you and the planet

This remarkable copolyester is made possible by Eastman's molecular recycling technology that transforms plastic waste into durable materials. This process breaks down hard-to-recycle plastic into its basic molecular building blocks, which allows plastic to be recycled again and again without degrading in quality.

Tritan Renew provides our manufacturing partners with a material made of 50% certified recycled content,* offsetting the use of fossil fuels and lowering greenhouse gas emissions.

**Recycled content is certified through ISCC mass balance allocation.*

tritan™ RENEW
