Tritan™ Renew from Eastman

Elevate your juicer's sustainability.

Life is sweeter with renewed materials.

Eastman Tritan™ Renew copolyester is the trusted material leader for superior juicers. Our materials outperform other market options without compromising design aesthetics, so brands can bring more of the most innovative products to consumers with up to 50% certified recycled content.*

Chemical resistance — Tritan Renew stands up to limonene and acidic fruit compounds better than other materials, which can degrade with use.

Clarity — See juice as you make it. Our crystal clear materials dazzle like glass without getting hazy or stained.

Value — The juice is worth the squeeze. Thanks to its durability and transparency, Tritan Renew enhances the user experience without added production costs.

Durability — Tritan Renew is nearly unbreakable and stands up to frequent use, so it's perfect for a busy kitchen or bar.

Lightweight — Tritan Renew is a lightweight material, unlike heavier stainless steel or glass.

Dishwasher safe — Tritan Renew handles heat and maintains its premium aesthetic through repeated dishwasher cycles.

Food contact safe — Our materials are free of all bisphenols, including BPA and BPS.

Taste and odor resistant — Juicers made with Tritan Renew prevent flavors from carrying over from one juice to another. Plus, it won't leave a metallic taste behind.

Total performance — While some alternatives work well in some performance areas, juicers made with Tritan Renew offer all around excellence.

*Recycled content is certified through ISCC mass balance allocation.

tritan™ RENEW
from Eastman

Good for you and the planet

This remarkable copolyester is made possible by Eastman’s molecular recycling technology that transforms plastic waste into durable materials. This process breaks down hard-to-recycle plastic into its basic molecular building blocks, which allows plastic to be recycled again and again without degrading in quality.

Tritan Renew provides our manufacturing partners with a material made of 50% certified recycled content,* offsetting the use of fossil fuels and lowering greenhouse gas emissions. Take your sustainability story to the next level. Meet your sustainability goals with to-go containers that are good for you, your customers and the planet.

**Recycled content is certified through ISCC mass balance allocation.*

Benefits of Tritan Renew

Material	Chemical resistance to citrus	Residential dishwasher durability	Impact resistance/toughness	Stain and odor resistance	Color/clarity	BPA free
