

Tenite™ cellulosics

The natural polymer

A unique material manufactured from renewable cellulose—not manufactured with BPA (bisphenol A)

Material attributes

- Tough/durable—designed to last
- Feels like wood—warm to touch
- Sounds like wood—dull noise
- Exhibits exceptional clarity
- Molds and extrudes easily
- Can be made with intense color
- Can hold scent

The original biopolymer

Cellulose used to make Tenite™ cellulosics comes from trees harvested from sustainably managed forests. For every pound of Tenite produced, 40% to 50% by weight is renewable content.

For more information,
visit www.eastman.com.

From trees to plastic

Tenite cellulose esters expand the user's experience and interaction with plastics. Not only does Tenite feel very soft and natural to the touch, it can speak to the sense of smell with the ability to have scents compounded into the plastic.
