

Puttering around with technology

Frankly Golf creates F16 Stealth Putter made with Eastman's Tenite™ cellulosics.

Tenite, a timeless material known for its toughness and clarity and first used in the 1930s, is cast in a new light for the cutting edge design of a golf putter. In a bold new look that brings technology to the forefront, designer Frank Thomas—president of Frankly Golf and chief technical advisor to *Golf Digest* and The Golf Channel—chose to sheath his F16 Stealth putter head in the translucent Tenite™ cellulosics. The F-16 features inner-core putter technology: a bespoke weighting system to iron out hesitancy in the swing and toe/heel tungsten stabilizers. Thomas wanted a club that feels good and sounds good and, like no other, showcases the advanced technology. Golfers like the reassuring feel and tone of Tenite, a natural material made from wood pulp, so with the F16—it's Fore! on the green.

For more information on Tenite™ cellulosics, visit www.eastman.com/tenite.

Frankly Golf's F16 putter made with Tenite features advanced technology.
