

Naia™ from Eastman

Wood pulp supplier source

Eastman Naia™ cellulosic fibers are produced from trees harvested from sustainably managed forests in accordance with our wood pulp sourcing policy. They are made from dissolving-grade wood pulp sourced from qualified suppliers who comply with the standards of internationally recognized forest certification programs. These certifications can be found online.

Sustainably sourced wood pulp

- Bracell: Camaçari, Bahia (Brazil)
- Georgia-Pacific Cellulose: Foley, Fla. (U.S.A.)
- Rayonier Advanced Materials: Jesup, Ga., and Fernandina Beach, Fla. (U.S.A.)

Sustainable textiles belong to everyone.
