Sustainability Accounting Standard Board Index (SASB)

Sustainability Accounting Standards Board Index (SASB)

Eastman is committed to continually improving its ESG and sustainability-related disclosure. Beginning to report against the Sustainability Accounting Standards Board (SASB) standards is important to our ongoing efforts to identify, manage and report on the sustainability topics that matter most to our stakeholders. This index provides the location of Eastman’s information pertaining to the SASB standards for what SASB refers to as the “resource transformation” sector — a part of which is the chemicals industry. For those standards that we currently do not report against, we are evaluating our internal reporting and data collection processes to determine the feasibility of future disclosure.
