

Energy

POLICY

OUR GOAL

Continuously improve energy efficiency and minimize overall energy impact.

MEASURE

Millions of BTUs per thousand kilograms produced.

PRINCIPLES

Leadership / Management

Support, emphasize and recognize energy efficiency improvements. Encourage energy efficiency design in products, processes and facilities.

Empowerment

Provide the knowledge, information and authority to take action so that the best energy decisions are made. Encourage energy conservation by employees in their work and personal activities.

Innovation

Identify or develop, and implement creative processes, technologies, and projects that contribute to energy goals and improve the reliability of energy systems. Incorporate energy efficiency as a component of new products for consumers.

Environmental Stewardship and Sustainability

Promote understanding of the link between energy efficiency improvements, most efficient use of resources, and waste and emissions reductions. Demonstrate linkage to company sustainability goals.

Partnerships

Advance the knowledge of energy efficiency by partnering with governmental agencies, peer companies, and energy providers. Participate in available energy programs.

Reliability

Secure adequate and reliable energy supplies at the most advantageous rates and implement contingency plans to protect operations from energy supply interruptions.
