EASTMAN

Mixing function and form

Dualit Ltd. chooses Eastman Tritan™ copolyester for its new two-liter blender jar.

Dualit Ltd. makes professional-grade kitchenware with a reputation for long working life and rugged reliability. That's why Dualit chose Eastman Tritan™ copolyester for its new two-liter blender jar. Tritan, a BPA-free material, has the clarity, toughness, and dishwasher durability to match Dualit's high quality products. Dualit was impressed by Eastman's exhaustive testing of Tritan, which displayed a resistance to hazing or cracking, shatterproof characteristics, and excellent toughness throughout the tests.

"Customers benefit from the material's toughness, clarity, and aesthetic appeal," said Alex Gort-Barten, brand director for Dualit. "Kitchenware made of Eastman Tritan copolyester looks similar to glass but is much lighter and stronger."

For more information on Eastman Tritan™ copolyester, visit www.eastman.com/tritan.

Dualit's two-liter blender jar mixes well with the toughness and clarity of Eastman Tritan copolyester.
