EASTMAN

Unique properties for a unique product

The Polar Pitcher takes advantage of the toughness, durability, and clarity of Eastman Tritan™ copolyester.

Inspired by the desire for cold draft beer in bars and restaurants, the goal of the innovative Polar Pitcher is to keep drinks cold for an extended period without the watered-down effect of melting ice. The clear, 60-ounce pitcher, made from Eastman Tritan™ copolyester, has a built-in metal cooling cylinder to keep beverages cold without dilution or contamination. Polar Plastech, Inc., makers of the Polar Pitcher, chose BPA-free Tritan because it has all the properties the unique pitcher requires: clarity, dishwasher durability, toughness, and stain and odor resistance. The Polar Pitcher, used in restaurants, bars, and hotels across the country, is now available for home use through consumer houseware retailers.

For more information on Eastman Tritan™ copolyester, visit www.eastman.com/tritan.

The Polar Pitcher is clear, durable, and dishwasher safe thanks to Eastman Tritan™ copolyester.
