

Putting sustainability on the menu

Rubbermaid Commercial Products chooses Eastman Tritan™ copolyester to produce BPA-free food service solutions.

The term “organized chaos” is not an oxymoron in a busy commercial kitchen. The equipment and containers have to stand up to heavy use, frequent washing, and stringent food safety regulations. That's why Rubbermaid Commercial Products, the leader in solution-based commercial products, teamed up with Eastman to develop a line of first-to-market, BPA-free sustainable products that can handle the demands of a busy restaurant. The key ingredient in this recipe for success is Eastman Tritan™ copolyester, an innovative material that offers durability, clarity, and sustainability. Even after repeated commercial dishwashing, Tritan will not crack or craze. Its inherent toughness increases product life and reduces waste, improving sustainability in the food service industry.

For more information on Eastman Tritan™ copolyester, visit www.eastman.com/tritan.

Durability, clarity, and sustainability stack up nicely in the kitchen with Eastman Tritan™ copolyester.
